Target Intruder:

Mosquito Intruders—Target Burma Jeremy Walsh, 2025-08-05 Uses diaries first hand accounts and official records to take the reader through the Mosquito intruders three year campaign to help force the Japanese out of Burma living and dying with the brave warriors in the five squadrons which flew the FB VI The exploits of the Mosquito crews in Burma skimming at low level and at speed along rivers and over treetops to their targets are the stuff of legend Surprisingly however only five RAF squadrons ever flew these operations Mosquito Intruders Target Burma explores the achievements of these intruder squadrons as well as the costs to the men who flew and supported them Their story starts in mid 1943 almost as soon as the fighter bomber variant of the Mossie the iconic de Havilland Mosquito FB VI had been introduced to squadron service in the UK The first challenge was to deliver the new aircraft with its radical wooden construction to India and build a supply chain to support it Then with few dual control aircraft they needed to train the crews to operate the Mosquito to the limits of its performance in often hostile weather over inhospitable territory against an aggressive enemy Some crews converted from a similar low level role to extend the reach of the impressive but already obsolescent Beaufighter Other squadrons converting from the single engine Vultee Vengeance dive bomber needed to learn how to handle a faster twin engine intruder and to fly at low level Against the odds both the aircraft and their crews delivered Mosquito Intruders Target Burma uses diaries first hand accounts and official records to take the reader through the Mosquito intruders three year campaign to help force the Japanese out of Burma living and dying with the brave warriors in the five squadrons which flew the FB VI The first operations were flown by 27 Squadron led by the renowned Wing Commander James Nicolson VC the only person in RAF Fighter Command to be awarded the Victoria Cross during the Second World War Many of the airmen like the author s father who flew Mossie intruder ops with both 27 and 45 Squadrons felt that they were forgotten by the public back home and often by their own high command But importantly they knew that their actions were shortening the war in the Far East

Privacy in Statistical Databases Josep Domingo-Ferrer, Yücel Saygin, 2008-09-22 Privacy in statistical databases is a discipline whose purpose is to provide solutions to the tension between the increasing social political and economical demand of accurate information and the legal and ethical obligation to protect the privacy of the various parties involved Those parties are the respondents the individuals and enterprises to which the database records refer the data owners those organizations spending money in data collection and the users the ones querying the database who would like their queries to stay confidential Beyond law and ethics there are also practical reasons for data collecting agencies to invest in respondent privacy if individual respondents feel their privacy guaranteed they are likely to provide more accurate responses Data owner privacy is primarily motivated by practical considerations if an enterprise collects data at its own expense it may wish to minimize leakage of those data to other enterprises even to those with whom joint data exploitation is planned Finally user privacy results in increased user satisfaction even if it may curtail the ability of the database owner to please users

There are at least two traditions in statistical database privacy both of which started in the 1970s one stems from official statistics where the discipline is also known as statistical disclosure control SDC and the other originates from computer science and database technology In official statistics the basic concern is respondent privacy
