**A Taste of Reality** Kimberla Lawson Roby, 2009-03-17 Kimberla Lawson Roby returns with another moving and triumphant novel about a woman who against all odds battles the most blatant kind of workplace discrimination while dealing with a crumbling marriage and a trusted friend's betrayal. On the surface Anise seems to have it all: a successful career, a solid marriage, and good friends. But when she applies for a promotion at work, she loses out to a white colleague who isn't nearly as qualified for the job. However, the problem at work is only the beginning of Anise's troubles. After being married for four seemingly blissful years, she discovers that her husband is having an affair. And to make matters worse, her best friend at work is keeping dangerous secrets. But Anise is no quitter. As brave as she is determined, she reaches deep inside her soul to find the strength and courage to overcome heartbreak and stay her course. Ultimately, she will discover that what is worth having is worth fighting for in her career and most importantly in her heart. With a compelling plot and writing that captures every emotion, *A Taste of Reality* is a deeply poignant and unforgettable story.

**Korean Film** Eungjun Min, Jinsook Joo, Han Ju Kwak, 2003-04-30 Despite its rise in the global market, recent political progress, and a surging interest worldwide, Korean films are relatively unknown and rarely studied. This new work begins by investigating the history, industry structure, and trends of filmmaking in Korea, going on to examine how Hollywood films have affected both Korean mainstream and nonmainstream film industries in terms of both means of production and narrative. Moreover, the authors analyze the ways in which Korean films of recent years have represented the modernization process in Korea itself, as well as the ideological implications that arise from the cinematic constructions of Korean imagination. More than a mere chronological account of Korean cinematic history, *Korean Film* attempts to consider the films as a popular cultural form that have a life beyond their theatrical runs. Stars, genres, and key movies become part of any culture's identity, and in their narratives and meanings can be located evidence of the ways in which a culture makes sense of itself. Korea has never before been given such an extensive treatment of this central idea, and here for the first time the nation's culture and cinema are merged into one discussion that both reflects and shapes our understanding of it.

*Mystical Experience of Reality* Keith Michael Hancock, 2019-12-10 The *Mystical Experience of Reality* is a well-known, nonbiological, nonhuman historical phenomenon that engulfed the author as a 14-year-old several times every year until his late thirties, filling him with the experience of a Reality in which all things known and unknown exist at its behest, guarding, guiding, accepting everything that exists separately, personally, individually. It is benign and uninterested in human wants or constructs such as religions, politics, ideologies. The author is what Buddhism would call a pratyakabuddha, a silent buddha whose experience of this Reality was spontaneous without having been requested or by given human help, a mystic. He insists the experience of Reality is caught, not taught; that it cannot be evangelized or proselytized, worshipped, or used. Reality rules; its ways are not our ways. Our ways are not Reality's. Jesus failed. Religions are not spiritual, just emotional. So the book started with a Blog, [mysticexperiences.net](http://mysticexperiences.net), for the author.

to examine himself and existence in accordance with the way of Reality Accordingly he found nothing in humanity worth studying This book is a summation of four years of using writing the blog to explore the awareness given him by his mystical experiences in the hope it will add to the literature on the subject which is now being more seriously studied around the world than it has ever been by physicists metaphysicists philosophers theologians psychologists even cosmologists and especially Seekers for whom the author has special messages for their unique hunger and thirst The book also seeks to pass on Reality s message to the author All is well

Images from the Mirror of Reality Nigel Hyatt,2017-03 Humankind is the product of millions of years of evolution The question is has human evolution reached a peak or can we develop even further Many signposts indicate that the answer is yes we can go further While the bulk of human evolution has been a blind unconscious process rather than sit back and allow nature to take its course it is time to take matters into our own hands and usher in the next stage of human progress Thousands of individuals have attained this conscious evolution of the selfenlightenment over the centuries Defying the conventional wisdom of scientists and those who hold to conventional forms of religion these individuals have followed well trodden paths toward illumination proving that neither life nor nature can be bound by any scientific theory or religious dogma This book is oriented toward those who count themselves among the free thinkers of the world those who are willing to explore the reality of the unknown rather than deny the existence of regions of the mind body and spirit simply because they do not conform to preconceived ideas This does not mean that our essence our basic identity has to be replaced or destroyed Rather it implies re examining ourselves so that we are able to conceive of a universe that is infinitely more complex and varied than we have imagined To this end the book employs both poetry and discourses to awaken the dormant higher self FURTHER EVOLUTION IS POSSIBLE PROVIDED WE ARE WILLING TO EMBARK ON THE QUEST FOR truth

### *Figures of Reality* Roger

Cardinal, 2025-05-01 *Figures of Reality* 1981 may be described as a polemic against those who feel poetry to be remote from normal life an abstruse and empty game The author argues from a contrary perspective shared by many poets in the Romantic and Surrealist tradition in which poetry is viewed as being vitally related to our awareness of reality This penetrating discourse on the roots of poetry in the imagination suggests that the fascination of an illusory image lies precisely in our consciousness of its deflection from reality Poets can take hold of and manipulate these moments they are adept in the construction of unreality The deliberate cultivation of such states of awareness has been a preoccupation of many poets and literary theorists among them Coleridge De Quincey and Rimbaud Roger Cardinal's commentaries on the writing of these men as well as other texts drawn from nineteenth and twentieth century European poetry argues that poems have meaning for us to the extent that we recognise the relationship of the figure of speech on the page to the figure of reality as shaped by our perception of the world around us In this way the book uniquely develops an original and subtle theory of the role of imagination in poetry

**In Search of Reality** O. N. Krishnan, 2004-01-01 Comparative analysis of the philosophical systems of the Upanisads Advaita Vedanta and various schools of Buddhism **The Language of Reality** Dr. Thomas Stark, The answer to existence is that existence is an eternal language a language that solves itself optimizes itself perfects itself and finally speaks to itself and tells itself exactly what it is It is a language that becomes conscious of itself It might seem as though humans became conscious through language but in fact language became conscious through humans In *The Selfish Gene* Richard Dawkins wrote We are survival machines robot vehicles blindly programmed to preserve the selfish molecules known as genes This is a truth which still fills me with astonishment In fact we are living language nodes of a living cosmic language that is using us to become conscious of itself Because we are language beings we create languages and through languages we eventually arrive at the original language the Ur Language the language in which we ourselves are written and expressed This is the numerical language of mathematics the language of energy of syntax and semantics the language of mind **Genetic Theory of Reality** James Mark Baldwin, Jaan Valsiner, 2017-07-12 James Mark Baldwin left a legacy that has yet to be fully examined one with profound implications for science and the humanities In some sense it paralleled that of his friend Charles Sanders Peirce whose semiotics became understood only a century later Baldwin was trying to make sense of complex biological and social processes that only now have come into the limelight as biological sciences have re emerged in psychology Baldwin's focus on development based on the observation of his own children and extrapolated to his general theoretical scheme is fully

in line with where contemporary biological sciences are heading This is exemplified by the bounded flexibility of the work of the genetic system The general principle of persistent exploration of the environment with the result of creating novelty which was the core of Baldwin s theoretical system has since the 1960s become the guiding idea in genetics Contemporary developmental science is rooted in Baldwin s thinking In his new introduction Jaan Valsiner shows that Baldwin s Genetic Theory of Reality demonstrates how human beings are in their nature social beings establishes an alternative conceptualization of evolutionary theory and formulates a system of developmental logic all of which serve as the foundation for developmental psychology as a whole This is a work of social science rediscovery long overdue **Mirror of Reality and Dreams** Irena Avsenik Nabergoj,2008 This book deals with the works of Ivan Cankar the greatest Slovenian writer focusing on his relation to existential social and moral reality as reflected in individuals and in society at large The method of literary analysis shows a surprising harmony between personal confessions and a rich symbolism that reveals the writer s unconditional belief in the power of conscience strong conviction of the sense of victims and the longing for the triumph of love and justice A holistic interpretation yields the conclusion that most of Cankar s works are confessions that purport to be true to life His inclination to self disclosure in dreams alongside the objective disclosure of imperceptible reality indicates that expressive language and a lyrical style are of vital importance to him *Art & Religion* Von Ogden Vogt,1921

Pailin,2024-12-06 Can belief in God be rational David A Pailin identifies the reasons behind this questioning of theistic faith in his book God and the Processes of Reality originally published in 1989 and demonstrates how the supposed incoherences in the concept of God are due to the generalization of partial insights He establishes the basic character of the concept of God and examines the nature of the major attributes of the divine and of the relationship of God to the processes of reality looking at God as creator the relation of God to historical events and the role of God as the basis for individual fulfilment The book takes up many of the insights developed by Whitehead and Hartshorne in what is commonly known as process thought Pailin explains these insights and counters common misapprehensions about them critically sometimes radically so to present a credible understanding of the God of theistic belief and a coherent understanding of the relationship of that God to the processes of reality This book will be of interest to students and researchers of religion and philosophy Tagore, Einstein and the Nature of Reality Partha Ghose,2019-04-02 This volume consists of a selection of scholarly essays from literature philosophy and history on the conception of reality as understood by Rabindranath Tagore and Albert Einstein The nature of reality has been a long debated issue among scientists and philosophers Tagore 1861 1941 met Einstein 1879 1955 at the latter s house in Kaputh Germany on 14 July 1930 and had a long conversation on this issue This conversation has been widely quoted and discussed

by scientists philosophers and scholars from the literary world The important question that Tagore and Einstein discussed was whether the world is a unity dependent on humanity or the world is a reality independent of the human factor Einstein believed that reality is independent of the mind and the human factor On the other hand Tagore adopted the opposite view Nevertheless both Einstein and Tagore claimed to be realists their conceptions of reality were obviously fundamentally different Where does the difference lie Can it be harmonized at a deeper level This volume brings together for the first time a gamut of views on this subject from eminent scholars It presents some key reflections on reality language poetry truth science personality human sciences virtue ethics intelligibility and creativity It will be useful to scholars and researchers of philosophy literature history and political studies as also to those interested in Tagore
