La información de contabilidad adecuada y precisa es esencial para todas las decisiones gerenciales y financieras. Los gerentes preparan informes financieros para el uso interno y externo. El uso preciso de los datos y la selección de los métodos de contabilidad relacionados con las estimaciones y mediciones de rendimiento de las empresas aumenta la fiabilidad de los informes financieros. La utilización precisa de los datos no se refiere sólo a los principios y directrices de contabilidad; depende de otras cuestiones tales como la preparación, la creencia y la ética de los contadores. Diversos factores que incluyen cuestiones relacionadas con la educación y el punto de vista de los contadores influyen en la ética de los contadores. Los temas relacionados a la cadena de valor influyen en la toma de decisiones de contabilidad. La independencia de los contadores es una cuestión importante para mantener los informes de contabilidad pertinentes. Sin embargo, es difícil aislar a los contadores a partir del contexto de trabajo. Por lo tanto, se requieren guías y normas de contabilidad adecuadas para lograr en cierta medida la objetividad de los contadores. Este texto se relaciona con los conceptos básicos, los métodos, la estimación y aplicación de la información de contabilidad utilizada para la toma de decisiones. El texto está organizado de la siguiente manera:
