source and target texts special provisions required by clients timeframe qualifications and sociocultural and political issues The framework posits that such factors should underpin any arguments used by the translator in adopting a given strategy and in turn that any criticism of a translation s quality must be in line with the same argumentative structure Applied to a corpus of translation examiners reports of translation the book demonstrates how this framework can act as a tool to be scaled to fit the needs of the different actors of a translation translators critics and scholars This book will be of interest to scholars in translation studies and practicing translators
