Gewertz, Frederick K. Errington, 1999-08-26 This accessible 1999 study of social class in contemporary Papua New Guinea deals with the new elite its culture and its institutions and its relationship to the broader society The Papua New Guinea described here is not a place of exotic tribesmen but a modernising society shaped by global forces and increasingly divided on class lines The authors describes the life style of the elite Wewak a typical commercial centre their golf clubs and Rotary gatherings and bring home the ways in which differences of status are created experienced and justified In a country with a long tradition of egalitarianism it has become at once possible and plausible for relatively affluent nationals to present themselves in a wide range of contexts as fundamentally superior to bushy people to blame the poor for their misfortunes and to turn their backs on their less successful relatives      **Social Class and Television Drama in Contemporary Britain** David Forrest, Beth Johnson, 2017-06-13 This collection is a wide ranging exploration of contemporary British television drama and its representations of social class Through early studio set plays soap operas and period drama the volume demonstrates how class provides a bridge across multiple genres and traditions of television drama The authors trace this thematic emphasis into the present day offering fascinating new insights into the national conversation around class and identity in Britain today

The chapters engage with a range of topics including authorial explorations of Stephen Poliakoff and Jimmy McGovern case studies of television performers Maxine Peake and Jimmy Nail and discussions of the sitcom genre and animation form This book offers new perspectives on popular British television shows such as Goodnight Sweetheart and Footballers Wives and analysis of more recent series such as Peaky Blinders and This is England Growing up Working Class Thomas J. Gorman, 2017-08-10 This enlightening auto ethnography examines how social class and other social institutions and structures affect how people grow up Primarily the book investigates how American children and young adults are impacted by the hidden injuries of class and offers a rich description of how these injuries manifest and curdle later in life Thomas J Gorman provides sociological explanations for the phenomenon of the so called angry white man and engages with this phenomenon as it relates to the rise of recent populist political figures such as Donald J Trump He also examines how and why white working class people tend to lash out at the wrong social forces and support political action that works against their own interests Finally the book demonstrates the connections between working class attitudes toward schooling sports politics and economics *The Hidden Life of Girls* Majorie Harness Goodwin, 2008-04-15 Winner of the Best Book of 2008 from The International Gender and Language Association In this ground breaking ethnography of girls on a playground Goodwin offers a window into their complex social worlds Combats stereotypes that have dominated theories on female moral development by challenging the notion that girls are inherently supportive of each other Examines the stances that girls on a playground in a multicultural school setting assume and shows how they position themselves in their peer groups Documents the language practices and degradation rituals used to sanction friends and to bully others Part of the Blackwell Studies in Discourse and Culture Series **The Hidden Curriculum** Rachel Gable, 2021-01-19 A revealing look at the experiences of first generation students on elite campuses and the hidden curriculum they must master in order to succeed College has long been viewed as an opportunity for advancement and mobility for talented students regardless of background Yet for first generation students elite universities can often seem like bastions of privilege with unspoken academic norms and social rules The Hidden Curriculum draws on more than one hundred in depth interviews with students at Harvard and Georgetown to offer vital lessons about the challenges of being the first in the family to go to college while also providing invaluable insights into the hurdles that all undergraduates face As Rachel Gable follows two cohorts of first generation students and their continuing generation peers she discovers surprising similarities as well as striking differences in their college experiences She reveals how the hidden curriculum at legacy universities often catches first generation students off guard and poignantly describes the disorienting encounters on campus that confound them and threaten to derail their success Gable shows how first gens are as varied as any other demographic group and urges universities to make the most of the diverse perspectives and insights these talented students have to offer The Hidden Curriculum gives essential guidance on the critical questions that university leaders need to consider as they strive to support first generation students on

campus and demonstrates how universities can balance historical legacies and elite status with practices and policies that are equitable and inclusive for all students
