**Formulas for the E6-B Air Navigation Computer** Frank Hitchens,2013-06-11 *Formulas for the Air Navigation  
Computer* is written for pilots and air navigators at all levels of experience from the novice to the professional The book is  
self help on how to use the E6 B Air Navigation Computer An E6 B Air Navigation Computer is a circular slide rule with a  
wind slide on the reverse side It is dedicated to performing all calculations related to pre flight planning and in flight air  
navigation Every pilot has an E6 B Air Navigation Computer which is supplied with a very brief instructional booklet when  
the E6 B is purchased However the booklet only covers a few basic formulas and many more formulas are required for  
passing the pilot navigation exams at various levels and of course for all operational flying Obtaining all these different  
formulas from various sources is time consuming as this author has discovered over the years They are not readily available  
in one book This is the reason for writing *Formulas for the Air Navigation Computer* it is a unique collection of air navigation  
computer formulas The formulas are written as they appear when set up on the E6 B Air Navigation Computer A full  
description on how to solve each formula is included along with a worked example and also the methods for using the wind  
slide to calculate wind triangle and other navigational problems associated with the wind slide The book is easy to follow by  
the novice pilot and a convenient reference source for the more experienced pilot The book is complete with all the formulas  
a pilot of any level should need to know It is laid out in a simple way with over 122 formulas and methods covering Time
