

THE FUTURE OF THE EUROPEAN BUILT ENVIRONMENT

What will the European built environment look like in 2050? It is shaped by the effects of climate change, resource scarcity, changes in population, urbanisation, and focus on health and wellbeing. Buildings integrate a vast amount of technology that connect buildings to information management and sharing platforms. Buildings have evolved into temporary storage of circular materials and products and have become data hubs that support optimal resource efficiency and wellbeing.

CLIMATE RESILIENT

Buildings are entirely climate resilient, green, energy neutral buildings that are designed to withstand floods and heat stress, and that are part of climate resilient zones and urban areas.

FLEXIBLE BUILDINGS

Buildings will facilitate flexibility. They are adapted for changes in use on the short-term, while being constructed for the long-term. Smaller and flexible units will provide living spaces for the growing urban population.

COGNITIVE BUILDINGS

Buildings will be able to autonomously manage its internal climate (light, temperature, air) and efficiently adjust e.g. energy use by themselves. Cognitive buildings are connected to smart grids and are part of the net.

BUILDINGS FOCUS ON PERFORMANCE

The sustainability, performance, energy performance, and other performance are central drivers for comfortable living and working, and also determine the value of a building.

ENABLING WORKING AND LIVING IN A 24-HOUR ECONOMY

In our 24-hour global economy buildings will provide continued working and living space. Libraries, sports, shops and other amenities are combined in buildings that provide 24-hour connectivity.

CIRCULAR BUILDINGS

Buildings are circular built with reused materials and/or recycled materials, are modular and decomposable. They have become a temporary storage of materials and products.

ENERGY POSITIVE

Buildings create energy through photovoltaic solutions and are highly energy efficient and independent of fossil fuels. Buildings are connected to a smart grid to share and store electricity and heat.

SUPPORT A HEALTHY LIFESTYLE

Buildings provide a healthy environment: healthy noise management, optimal temperature management, clean air and daylight. The design fully supports the wellbeing of its users.

Smart And Sustainable Built Environments:

Smart and Sustainable Built Environments Jay Yang, Peter S. Brandon, Anthony C. Sidwell, 2008-04-15 This book brings together a group of international specialists to explore the current state of the art and future potential for encouraging developing and implementing smart and sustainable built environment strategies It covers a broad spectrum of issues ranging from technological advancement through the assessment of past experiences to communication and education requirements and future strategies provides a snapshot of current methods and technologies for developing smart and sustainable built environment strategies over 30 fully refereed chapters from international experts addresses the particular requirements and problems of difference areas and climatic regions

Smart and Sustainable Built Environments, 2007 Sustainable development is rapidly becoming a global phenomenon the remit of which encompasses a wide range of professions and societal interest groups This collection of papers from the CIBT ask Group 55 smart and sustainable built environments presents key findings to date on a wide range of current research and practice in this emerging field in order to promote awareness understanding and synergy The first five papers in this e book focus directly on sustainability while the final three papers identify cross cutting them as associated with tools processes and culture

Smart and Sustainable Cities and Buildings Rob Roggema, Anouk Roggema, 2020-05-11 This book brings together the papers presented at the Smart and Sustainable Built Environments Conference 2018 SASBE This latest research falls into two tracks smart and sustainable design and planning cities and the technicalities of smart and sustainable buildings The growth of smart cities is evident but not always linked to sustainability This book gives an overview of the latest academic developments in increasing the smartness and sustainability of our cities and buildings Aspects such as inclusivity smart cities place and space the resilient city urbanity and urban ecology are prominently featured in the design and planning part of the book while energy educational buildings comfort building design construction and performance form the sub themes of the technical part of the book This book will appeal to urban designers architects urban planners smart city designers and sustainable building experts

Proceedings of the International Conference on Sustainable Development and Smart Built Environments Ali GhaffarianHoseini, Amirhosein G. haffarianHoseini, Farzad Rahimian, Mahesh Babu Purushothaman, 2025-04-12 This book presents peer reviewed articles from the International Conference of Sustainable Development and Smart Built Environments SDSBE2024 held from 6-8 Nov at Auckland New Zealand It encapsulates cutting edge research in Sustainable Development and Smart Built Environments featuring global scholars Encompassing diverse themes the book explores sustainable urban development governance and policy emphasizing urban greening and climate resilience It delves into innovative approaches for sustainable transport intelligent infrastructure and community well being The integration of Data Science AI and IoT for optimizing built environments is a focal point alongside advancements in digital twins and OpenBIM Social aspects including equity and indigenous perspectives are explored along with health

Sustainable Built Environment and Urban Growth Management Wann-Ming Wey, 2020-02-21 Nowadays the sustainable built environment planning in most cities has come to a turning point as the growth in traffic and population has become a serious concern and put tremendous pressure on both the environment and people in these cities It is therefore important to find new ways or lifestyles such as compact city transit oriented development TOD formulations that are more flexible inclusive and sustainable Furthermore for the sustainable built environment and urban growth management not only should the growth management principles which include smart growth sustainable growth and inclusive growth be taken into account but innovative smart planning strategies such as mixed use design green transport and new urbanism are also utilized in planning sustainable built environments in order to prevent the urban sprawl development that has occurred *Sustainable Built Environment for People and Society*, 2025-07-30 The pursuit of sustainable built environments has become a strategic global priority in addressing the complex interplay of social economic environmental and human development challenges outlined in the United Nations Sustainable Development Goals SDGs Accelerating urbanization climate risks and widening inequality are placing unprecedented strain on cities and communities demanding a fundamental shift in how we design deliver and manage the built environment Sustainable built environments are central to achieving key Sustainable Development Goals SDGs particularly SDG 11 Sustainable Cities and Communities SDG 3 Good Health and Wellbeing SDG 7 Affordable and Clean Energy and SDG 13 Climate Action Built infrastructure must minimize environmental impact maximize energy efficiency and enhance the quality of life while placing people at the center ensuring inclusivity resilience and adaptability to future needs A leading example of this approach is the Zero Energy Mass Custom Home ZEMCH initiative ZEMCH promotes the delivery of affordable high performance housing that meets both individual and community needs By combining mass customization with energy

efficient design and renewable energy technologies ZEMCH homes aim to achieve net zero energy consumption reduce their carbon footprint and enhance occupant wellbeing Equity and accessibility must also be embedded in the built environment ensuring that all individuals regardless of income age or ability can access safe functional and dignified spaces Ultimately sustainable development is not only about constructing greener buildings but also about shaping environments that foster social cohesion environmental stewardship and long term wellbeing Achieving this requires cross sector collaboration meaningful community engagement and the integration of sustainability principles throughout the entire lifecycle of the built environment transforming it into a catalyst for positive change for both people and society

Sustainable Futures in the Built Environment to 2050 Tim Dixon, John Connaughton, Stuart Green, 2018-01-09 Brings together leading thinking on issues of new professional practice and on the future of a sustainable built environment This book focuses on both construction and development issues and examines how we can transition to a sustainable future by the year 2050 bringing together leading research and practice at building neighbourhood and city levels It deftly analyses how emerging socio economic technological and environmental trends will influence the built environment of the future The book covers a broad spectrum of interests across the scales of buildings communities and cities including how professional practice will need to adapt to these trends The broader context is provided by an analysis of emergent business models and the changing requirements for expert advice from clients Sustainable Futures in the Built Environment to 2050 A Foresight Approach to Construction and Development features chapters covering data and trends including historical data and UK and international case studies policies and practice related to the field current state of scientific understanding key challenges key technological advances including disruptive and systemic technological innovations change issues and critical uncertainties and future visions It provides A strong conceptual framework based on a Foresight approach Discussion of the key data and trends that underpin each chapter Coverage of both construction and property development Specially commissioned chapters by academics and practitioners A synthesis of the main findings in the book and key insights for the future to 2050 Sustainable Futures in the Built Environment to 2050 A Foresight Approach to Construction and Development is an important book for postgraduate students and researchers construction real estate and property development specialists engineers planners architects foresight and futures studies specialists and anyone involved in sustainable buildings

Sustainable Built Environments Vivian Loftness, 2020-09-23 This volume in the Encyclopedia of Sustainability Science and Technology Second Edition describes the breadth of science and engineering knowledge critical to advancing sustainable built environments from architecture and design mechanical engineering lighting and materials to water and energy public policy and economics Covering both building landscape and green infrastructure design and management detailed consideration is given to how the building sector the biggest player in the energy use equation can minimize energy demand while providing measurable gains for productivity health and the environment With a focus on the environmental context the

reader will understand how sustainable design merges the natural minimum resource conditioning solutions of the past daylight solar heat and natural ventilation with the innovative technologies including nature based solutions of the present The desired result is an integrated intelligent and as socially just as possible system that supports individual control with expert negotiation for resource consciousness

Smart Technologies and Design For Healthy Built Environments Ming Hu, 2020-09-10

Smart Technologies and Design for Healthy Built Environment connects smart technology to a healthy built environment that builds upon the sustainable building movement It provides an overall summary of the state of the art technologies that are applied in the built environment The book covers a broad spectrum of smart technology categories ranging from dynamic operability energy efficiency self regulating and self learning systems and responsive systems The foreseeable challenges that are associated with smart technologies are discussed and outlined in the book Firstly this book provides a snapshot of state of the art smart technologies being applied in the built environment It covers a broad spectrum of smart technology categories ranging from dynamic operability energy efficiency self regulating and self learning systems to responsive systems Secondly this book provides in depth analysis of the four primary components of health biological physical physiological and psychological their effects on wellbeing and cognitive performance are introduced as well Thirdly it connects smart technologies to those health influencing factors by reviewing three completed smart building projects This book can also serve as a basis for education and discussion among professionals and students of diverse backgrounds who are interested in smart technologies smart building and healthy building

Smart Technologies and Design for Healthy Built Environment serves as the basis for education and discussions among professionals and students who are interested in smart technologies smart building and healthy building as it bridges the gap between smart technologies and a healthy built environment The book also provides a foundation for anyone who is interested in the impact of smart technology on the health of built environment

Routledge Handbook of Smart Built Environment Weisheng Lu, Chimay J. Anumba, 2025-03-20

The primary aim of this edited volume is to document the current theories best practices and technological advancements in the move towards a Smart Built Environment SBE The needs to accelerate towards the SBE are numerous and include Increasing complexities and the need for interconnectivity within the built environment e g mega infrastructure projects Data driven decision making resulting in higher demand from clients e g smart design construction operation and end of life EOL High requirements from stakeholders e g system efficiency environmental performance green procurement Fast paced technological advancement and integration Natural disaster resilience of the built environment e g prediction smart control of building component Sustainability issues around the built environment In this book the interrelationships among the various lifecycle stages design construction operation and EOL the collective benefit of synergy at building level multi infrastructure level and city level as well as the ultimate goals in relation to the deployment of smart technologies in the industry are addressed Part I covers smart design and construction Part II smart living and operation and Part III broadens

the scope to the whole smart city Chapters examine How smart technologies can improve the effectiveness productivity and efficiency of the built environment An overview of theories and practices that are enabled by innovations and technologies for developing the SBE The basis for new research agenda new concepts and frameworks for future development This handbook documents the current theories practices and technologies and develops a holistic approach for research and practice by adopting a multidimensional outlook for the SBE It is an essential reference work for all built environment stakeholders from academia through to the professions Design and Management of Sustainable Built Environments Runming

Yao,2013-03-12 Climate change is believed to be a great challenge to built environment professionals in design and management An integrated approach in delivering a sustainable built environment is desired by the built environment professional institutions The aim of this book is to provide an advanced understanding of the key subjects required for the design and management of modern built environments to meet carbon emission reduction targets In Design and Management of Sustainable Built Environments an international group of experts provide comprehensive and the most up to date knowledge covering sustainable urban and building design management and assessment The best practice case studies of the implementation of sustainable technology and management from the BRE Innovation Park are included Design and Management of Sustainable Built Environments will be of interest to urban and building designers environmental engineers and building performance assessors It will be particularly useful as a reference book for undergraduate and postgraduate students in the built environment field Sustainable Built Environment Deepak Bajaj,Thayaparan Gajendran,Sanjay Patil,2024-02-22 This book presents the select proceedings of International Conference on Sustainable Built Environment ICSBE 2023 It discusses the issues of sustainability and resilience in all types of building projects construction projects operational building and infrastructure projects within urban regions of the world The key themes covered in this book are sustainable urban planning sustainable construction real estate housing net zero built environment climate change policy legal framework climate finance technology and innovation toward decarbonization of the built environment This book is useful for researchers and professionals working in the fields of construction management built environment and allied fields

Future Challenges in Evaluating and Managing Sustainable Development in the Built Environment Peter S. Brandon,Patrizia Lombardi,Geoffrey Q. Shen,2017-04-05 Future Challenges in Sustainable Development within the Built Environment stimulates and reinterprets the demands of Responsible and Sustainable Development in the Built Environment for future action and development It examines the methods of evaluation the use of technology the creation of new models and the role of human factors for examining and developing the subject over the next twenty years *Cognitive Digital Twins for Smart Lifecycle Management of Built Environment and Infrastructure* Ibrahim Yitmen,2023-07-17 This book provides knowledge into Cognitive Digital Twins for smart lifecycle management of built environment and infrastructure focusing on challenges and opportunities It focuses on the challenges and opportunities of data driven cognitive systems by

integrating the heterogeneous data from multiple resources that can easily be used in a machine learning model and adjust the algorithms. It comprises Digital Twins incorporating cognitive features that will enable sensing complex and unpredicted behavior and reason about dynamic strategies for process optimization to support decision making in lifecycle management of the built environment and infrastructure. The book introduces the Knowledge Graph KG centric framework for Cognitive Digital Twins involving process modeling and simulation ontology based Knowledge Graph analytics for process optimizations and interfaces for data operability. It offers contributions of Cognitive Digital Twins for the integration of IoT Big data AI smart sensors machine learning and communication technologies all connected to a novel paradigm of self learning hybrid models with proactive cognitive capabilities. The book presents the topologies of models described for autonomous real time interpretation and decision making support of complex system development based on Cognitive Digital Twins with applications in critical domains such as maintenance of complex engineering assets in built environment and infrastructure. It offers the essential material to enlighten pertinent research communities of the state of the art research and the latest development in the area of Cognitive Digital Twins as well as a valuable reference for planners designers developers and ICT experts who are working towards the development and implementation of autonomous Cognitive IoT based on big data analytics and context aware computing.

The Elgar Companion to the Built Environment and the Sustainable Development Goals Alex Opoku, 2024-02-12 Exploring the link between Sustainable Development Goals SDGs and the built environment this erudite Companion provides a comprehensive overview and critical examination of key topics and complex research issues. Structured around the 5Ps of the SDGs people planet prosperity peace and partnerships the Companion suggests potential routes for the future direction of research within this multidisciplinary field of study. [BIM-enabled Cognitive Computing for Smart Built Environment](#) Ibrahim Yitmen, 2021-06-17 The book provides knowledge in the Building Information Model BIM enabled cognitive computing methods for smart built environment involving cognitive network capabilities for smart buildings integrating Augmented Reality Mixed Reality in cognitive building concepts cognitive Internet of Things CIoT for smart cities Artificial Intelligence applications for cognitive cities and cognitive smart cities using big data and machine learning. It focuses on the potential requirements and implementation of CIoT paradigm to buildings Artificial Intelligence techniques reasoning and Augmented Reality Mixed Reality in cognitive building concepts the concept of cognitive smart cities in its complexity heterogeneity and scope and the challenge of utilizing the big data generated by smart cities from a machine learning perspective. The book comprises BIM based and data analytic research on cognitive IoT for smart buildings and cognitive cities using big data and machine learning as complex and dynamic systems. It presents applied theoretical contributions fostering a better understanding of such systems and the synergistic relationships between the motivating physical and informational settings. It reviews ongoing development of BIM based and data science technologies for the processing analysis management modeling and simulation of big and context data and the associated

applicability to cognitive systems that will advance different aspects of future cognitive cities The book also analyses the required material to inform pertinent research communities of the state of the art research and the latest development in the area of cognitive smart cities development as well as a valuable reference for planners designers strategists and ICT experts who are working towards the development and implementation of CIoT based on big data analytics and context aware computing

Proceedings of the 15th International Conference on Sustainable Built Environment Ranjith Dissanayake, Priyan Mendis, Sudhira De Silva, Shiromal Fernando, Upul Attanayake, Pradeep Gajanayake, 2025-07-29 This book highlights the latest knowledge and innovations in the fields of civil engineering and construction industry striving for a sustainable built environment This book consists of high quality innovative research findings selected from the proceedings of the 15th International Conference on Sustainable Built Environment ICSBE 2024 under the themes of sustainable construction urban green infrastructure and planning rainwater harvesting and water conservation high performance concrete indoor environmental quality and indoor plants wind and hydro power energy waste and wastewater management for enhanced sustainability impacts of climate change carbon footprint global climate model and landscaping material flows and industrial ecology sustainable materials etc

Integrated Building Intelligence Hamidreza Alavi, Soheila Kookalani, Farzad Rahimian, Núria Forcada, 2024-09-01 This book integrates of Building Information Modeling BIM and Decision Support Systems DSS in the field of building design construction and maintenance The book explores how BIM and DSS technologies can be synergistically utilized to enhance performance comfort and maintenance efficiency in buildings With an emphasis on practical applications the book provides a comprehensive overview of the latest advancements in BIM and DSS including real world case studies and implementation guidelines The book features illustrations tables and examples that aid in understanding complex concepts and demonstrate the practical application of BIM and DSS in building projects Readers will gain a deep understanding of how BIM and DSS can be integrated to optimize building design streamline construction processes and improve facility management and maintenance The main benefit of reading this book is that it provides a valuable resource for professionals in the architecture engineering and construction industries who want to leverage the power of BIM and DSS to enhance their building projects Additionally the book explores how BIM and DSS can contribute to energy efficiency

Sustainable Smart Cities and the Future of Urban Development Al-Humairi, Safaa Najah Saud, Hajamydeen, Asif Iqbal, Mahfoudh, Asmaa, 2024-12-05 As global urbanization continues to accelerate smart cities emerge as a strategy to address the complexities of modern urban life These cities invest in human and social capital communication infrastructure and technology to drive sustainable economic growth and ensure a high quality of life Participatory governance plays a crucial role in managing natural and man made resources effectively Driven by a growing global population and a pressing need to address environmental concerns the concept of a smart city has emerged as a potential solution Sustainable Smart Cities and the Future of Urban Development delves into the exciting intersection of

sustainable development and smart city technologies exploring how these forces can be harnessed to shape a more livable and resilient future for our urban environments Through a multidisciplinary lens this book explores the concept of sustainable smart cities by elucidating their fundamental characteristics and components Covering topics such as artificial intelligence AI renewable energy and waste management this book is an excellent resource for urban planners architects technology developers innovators community leaders industry professionals academicians researchers and more

Thank you very much for reading **Smart And Sustainable Built Environments**. As you may know, people have look numerous times for their chosen readings like this Smart And Sustainable Built Environments, but end up in infectious downloads.

Rather than reading a good book with a cup of tea in the afternoon, instead they cope with some malicious bugs inside their laptop.

Smart And Sustainable Built Environments is available in our book collection an online access to it is set as public so you can download it instantly.

Our book servers saves in multiple locations, allowing you to get the most less latency time to download any of our books like this one.

Merely said, the Smart And Sustainable Built Environments is universally compatible with any devices to read

Smart And Sustainable Built Environments Introduction

In the digital age, access to information has become easier than ever before. The ability to download Smart And Sustainable Built Environments has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Smart And Sustainable Built Environments has opened up a world of possibilities. Downloading Smart And Sustainable Built Environments provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Smart And Sustainable Built Environments has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Smart And Sustainable Built Environments. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Smart And Sustainable Built Environments. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Smart And Sustainable Built

Environments, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Smart And Sustainable Built Environments has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Smart And Sustainable Built Environments Books

1. Where can I buy Smart And Sustainable Built Environments books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Smart And Sustainable Built Environments book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Smart And Sustainable Built Environments books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.

7. What are Smart And Sustainable Built Environments audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Smart And Sustainable Built Environments books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
