Smoking Risk Perception And Policy:

Smoking Paul Slovic, 2001-05-23 This book presents a counter view based on a survey of several thousand young persons and adults probing attitudes beliefs feelings and perceptions of risk associated with smoking The authors agree that young smokers give little or no thought to health risks or the problems of addiction The survey data contradicts the model of informed rational choice and underscores the need for aggressive policies to counter tobacco firms marketing and promotional efforts and to restrict youth access to tobacco

Smoking W. Kip Viscusi, 1992 Are the risks of smoking exaggerated Has there been an open and rational discussion about the risks of smoking This book attempts to answer these and many other questions about the subject providing a detailed empirical presentation on smoking behavior as a risky consumer decision Using new empirical data based on several national and regional surveys Viscusi addresses a number of important issues including the sources of information that people have about the risks of smoking the accuracy of their perceptions of the risks associated with smoking and the consistency of smoking decisions with other risky behavior scrutinizing issues such as whether smokers value risk differently than those who wear safety belts Viscusi also looks at the differences in age groups and how they assess these risks based on public information He provides new insight into the degree to which individuals understand smoking risks and take these risks into account in their behavior With its detailed empirical data and its examination of individual decision making processes this work will interest researchers in public health public policy psychology and economics as well as anyone concerned with this important issue

Public Opinion, Public Policy, and Smoking Thomas R. Marshall, 2016-07-25 Public Opinion Public Policy and Smoking tracks Americans changing attitudes about cigarette smoking over the last century With data from more than five thousand public and privately conducted polls this book carefully examines how Americans came to understand the health risks of smoking how the tobacco industry sought to reframe smoking and how public opinion support for tobacco control affected lawsuits elections and public policies This book tests several well known linkage models that connect public opinion with public policy It shows that conventional wisdom about public opinion and tobacco control policy is often mistaken This book offers the first in depth look at American public opinion and cigarette smoking during the last century

Smoking Paul Slovic, 2001-05-23 This important book reveals why the young start smoking and why as adults they regret having started It is a great contribution to helping end a national epidemic CHERYL HEALTON President CEO American Legacy Foundation This book is a must for everyone concerned about how to address the problem of tobacco use among young people Virtually all new smokers are children Many of them are in their early teens and one out of every three children who begin to smoke will die prematurely because of their use of tobacco This book includes the most objective thorough and authoritative research to date on the critical question about whether young people fully understand the consequences of their decision to smoke at the time they start and whether they are able to make rational decisions about this vitally important decision It leaves the reader

with no doubt about the value of efforts to better educate our young people and to empower them to resist the lure of tobacco marketing MATTHEW MYERS President Campaign for Tobacco Free Kids Do individuals really know and understand the risks entailed by their smoking decisions The question is particularly important in the case of young persons because most smokers start during childhood and adolescence After years of intense publicity about the damages of smoking it is generally believed that every teenager and adult in the U S knows that smoking is dangerous to health thus decisions to smoke are informed choices This book presents a counter view based on a survey of several thousand young persons and adults probing attitudes beliefs feelings and perceptions of risk associated with smoking The authors agree that young smokers give little or no thought to health risks or the problems of addiction The survey data contradicts the model of informed rational choice and underscores the need for aggressive policies to counter tobacco firms marketing and promotional efforts and to restrict youth access to tobacco
