Tambo Life In An Andean Village:

Tambo Julia Meyerson, 2010-07-05 Perhaps the best way to sharpen one's powers of observation is to be a stranger in a strange land. Julia Meyerson was one such stranger during a year in the village of Tambo, Peru, where her husband was conducting anthropological fieldwork. Though sometimes overwhelmed by the differences between Quechua and North American culture, she still sought eagerly to understand the lifeways of Tambo and to find her place in the village. Her vivid observations recorded in this field journal admirably follow Henry James's advice: Try to be one of the people upon whom nothing is lost. With an artist's eye, Meyerson records the daily life of Tambo: the cycles of planting and harvest, the round of religious and cultural festivals, her tentative beginnings of friendship and understanding with the Tamboinos. The journal charts her progress from tolerated outsider to accepted friend as she and her husband learn and earn the roles of daughter and son in their adopted family. With its wealth of ethnographic detail, especially concerning the lives of Andean women, Tambo will have great value for students of Latin American anthropology. In addition, scholars preparing to do fieldwork anywhere will find it a realistic account of both the hardships and the rewards of such study.

Life and death of a rural village in Garamantian Times. Archaeological investigations in the oasis of Fewet (Libyan Sahara)

Lucia Mori, 2013-12-01 This volume presents the results of the archaeological investigations in the oasis of Fewet, SW Libyan Sahara, carried out by the Archaeological Mission in the Sahara of the Sapienza University of Rome. Evidences of an ancient rural village were identified under the houses of the modern town of Tan Afella and a large necropolis dated to the Garamantian times spread at the fringes of the modern settlement. Until 1997, very little was known on the Garamantian period in the Wadi Tanezzuft area and on the transition from the pastoral to the early historical phase. This period witnessed the gradual sedentarisation of human groups in the oases and the development of caravan routes with the flourishing of an intra and trans-Saharan trade. These processes also influenced by significant alterations in climate which led to the agricultural exploitation of the limited areas where water resources were available; the oases were archaeologically unknown as far as settlements were concerned. The archaeological surveys and excavations carried out in the area of Fewet were particularly promising and are here analysed in a multidisciplinary perspective which takes into consideration environmental and anthropological studies in the attempt to reconstruct the culture and the life of people inhabiting the Southern Fezzan region in early historical times. The historical archaeology of the Sahara remains an underdeveloped field of research, especially for the pre-Islamic period. The most significant exception to this rule has for long concerned the people known as the Garamantes who inhabited the central Saharan region coincident with Libya's south-west province Fezzan. This volume is a marvelous addition to the small corpus of published research on the Pre-Islamic oasis societies of the Sahara and provides a complementary perspective on the world of the Garamantes to the Anglo-Libyan work I have directed from their heartlands in the Wadi el Ajal, c. 400 km to north-east of Ghat. Prof. David J. Mattingly, University of Leicester, UK. *Kawsay Vida Rosaleen*

The Social Life of Numbers Gary Urton,Primitivo Nina Llanos,2010-07-05 Unraveling all the mysteries of the khipu the knotted string device used by the Inka to record both statistical data and narrative accounts of myths histories and genealogies will require an understanding of how number values and relations may have been used to encode information on social familial and political relationships and structures This is the problem Gary Urton tackles in his pathfinding study of the origin meaning and significance of numbers and the philosophical principles underlying the practice of arithmetic among Quechua speaking peoples of the Andes Based on fieldwork in communities around Sucre in south central Bolivia Urton argues that the origin and meaning of numbers were and are conceived of by Quechua speaking peoples in ways similar to their ideas about and formulations of gender age and social relations He also demonstrates that their practice of arithmetic is based on a well articulated body of philosophical principles and values that reflects a continuous attempt to maintain balance harmony and equilibrium in the material social and moral spheres of community life

Growing Up in a Culture of Respect Inge Bolin,2010-01-01 Far from the mainstream of society the pastoral community of Chillihuani in the high Peruvian Andes rears children who are well adjusted creative and curious They exhibit superior social and cognitive skills and maintain an attitude of respect for all life as they progress smoothly from childhood to adulthood without a troubled adolescence What makes such child rearing success even more remarkable is that childhood is not recognized as a distinct phase of life Instead children assume adult rights and responsibilities at an early age in order to help the community survive in a rugged natural environment and utter material poverty This beautifully written ethnography provides the first full account of child rearing practices in the high Peruvian Andes Inge Bolin traces children s lives from birth to adulthood and finds truly amazing strategies of child rearing as well as impressive ways of living that allow teenagers to enjoy the adolescent stage of their lives while contributing significantly to the welfare of their families and the

community Throughout her discussion Bolin demonstrates that traditional practices of respect whose roots reach back to pre Columbian times are what enable the children of the high Andes to mature into dignified resilient and caring adults

Woven Stories Andrea M. Heckman,2003 The Quechua people of southern Peru are both agriculturalists and herders who maintain large herds of alpacas and llamas But they are also weavers and it is through weaving that their cultural traditions are passed down over the generations Owing to the region s isolation the textile symbols forms of clothing and technical processes remain strongly linked to the people s environment and their ancestors Heckman s photographs convey the warmth and vitality of the Quechua people and illustrate how the land is intricately woven into their lives and their beliefs Quechua weavers in the mountainous regions near Cuzco Peru produce certain textile forms and designs not found elsewhere in the Andes Their textiles are a legacy of their Andean ancestors Andrea Heckman has devoted more than twenty years to documenting and analyzing the ways Andean beliefs persist over time in visual symbols embedded in textiles and portrayed in rituals Her primary focus is the area around the sacred peak of Ausangate in southern Peru some eighty five miles southeast of the former Inca capital of Cuzco The core of this book is an ethnographic account of the textiles and their place in daily life that considers how the form and content of Quechua patterns and designs pass stories down and preserve traditions as well as how the ritual use of textiles sustain a sense of community and a connection to the past Heckman concludes by assessing the influences of the global economy on indigenous Quechua who maintain their own worldview within the larger fabric of twentieth century cultural values and hence have survived everything from Latin American militarism to a tidal wave of post modern change
