Evolution Peter J. Bowler, 2003-07 The comprehensive and authoritative source on the development and impact on one of the most controversial of scientific theories

Explaining Human Origins Wiktor Stoczkowski, 2002-06-20 Wiktor Stoczkowski a palaeo anthropologist argues that the theories of human origins developed by archaeologists and physical anthropologists from the early nineteenth century to the present day are structurally similar to Western folk theories and to the speculations of earlier philosophers Reviewing a remarkable range of thinkers writing in a variety of European languages he makes a convincing argument for this case Even though the book criticises the lack of development in theories of human origins its conclusion is optimistic about the power of the scientific approach to deliver more reliable theories but only if the influences of popular discourse on its thinking are properly identified

Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

In Search of Human Nature Carl N. Degler, 1992-11-05 Winner of the Pulitzer Prize in History in 1972 and a past president of both the Organization of American Historians and the American Historical Association Carl Degler is one of America's most eminent living historians He is also one of the most versatile In a forty year career he has written brilliantly on race Neither Black Nor White which won the Pulitzer Prize women's studies At Odds which Betty Friedan called a stunning book Southern history the New Deal and many other subjects Now in The Search for Human Nature Degler turns to perhaps his largest subject yet a sweeping history of the impact of Darwinism and biological research on our understanding of human nature providing a fascinating overview of the social sciences in the last one hundred years Just how much of human nature is determined by genetics With this sweeping book Pulitzer prize winning historian Carl Degler provides an engrossing account of how we have grappled with that question by tracing the impact of Darwinism on the social sciences in the last hundred years The idea of biological roots to human nature was almost universally accepted at the turn of the century and was used to reinforce prejudice against women non whites and the poor whose positions were seen as the result of genetic weakness until it was discredited by the likes of Franz Boas Margaret Mead and B F Skinner But more recently Degler writes under the influence of Konrad Lorenz Jane Goodall Edward O Wilson and others a more objective approach has uncovered new links between evolution and human behavior A masterful work by one of America's preeminent historians In Search of Human Nature sheds brilliant new light on an essential question and how changing times have influenced the answers we have found

Weighty Issues Jeffery Sobal, 2017-09-08 Many people consider their weight to be a personal problem when then does body weight

become a social problem Until recently the major public concern was whether enough food was consistently available As food systems began to provide ample and stable amounts of food questions about food availability were replaced with concerns about ideal weights and appearance These interests were aggregated into public concerns about defining people as too fat and too thin Social constructionist perspectives can contribute to the understanding of weight problems because they focus attention on how these problems are created maintained and promoted within various social environments While there is much objectivist research concerning weight problems few studies address the socially constructed aspects of fatness and thinness This book however draws from and contributes to social constructionist perspectives The chapters in this volume offer several perspectives that can be used to understand the way society deals with fatness and thinness The contributors consider historical foundations medical models gendered dimensions institutional components and collective perspectives These different perspectives illustrate the multifaceted nature of obesity and eating disorders providing examples of how a variety of social groups construct weight as a social problem

The Temptations of Evolutionary Ethics Paul Lawrence Farber, 1994-10-11 Evolutionary theory tells us about our biological past can it also guide us to a moral future Paul Farber's compelling book describes a century old philosophical hope held by many biologists anthropologists psychologists and social thinkers that universal ethical and social imperatives are built into human nature and can be discovered through knowledge of evolutionary theory Farber describes three upsurges of enthusiasm for evolutionary ethics The first came in the early years of mid nineteenth century evolutionary theories the second in the 1920s and 30s in the years after the cultural catastrophe of World War I and the third arrived with the recent grand claims of sociobiology to offer a sound biological basis for a theory of human culture Unlike many who have written on evolutionary ethics Farber considers the responses made by philosophers over the years He maintains that their devastating criticisms have been forgotten thus the history of evolutionary ethics is essentially one of oft repeated philosophical mistakes Historians scientists social scientists and anyone concerned about the elusive basis of selflessness altruism and morality will welcome Farber's enlightening book

Nature: The nature of human nature David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents

The SAGE Handbook of Action Research Hilary Bradbury, 2015-06-19 The third edition of *The SAGE Handbook of Action Research* presents an updated version of the bestselling text including

Thompson, 2003-01-16** Volume 117 of the Proceedings of the British Academy contains 16 lectures delivered at the British Academy in 2001 Research On Altruism & Love Stephen Post, 2003-05-15 Research on Altruism and Love is a compendium of annotated bibliographies reviewing literature and research studies on the nature of love An essay introduces each of the annotated bibliographies A variety of literature directly related to science and love issues or supporting those issues is covered in the Religious Love Interfaces with Science section This annotated bibliography is unique in that it approaches the field from a decidedly religious perspective It includes classical expositions of love that continue to influence contemporary scholars including Platos work on eros the work and words of Jesus Aristotle Augustine of Hippo Martin Luther Kierkegaard and Ghandi among others The contemporary discussion includes Anders Nygren s theological arguments in his classic Agape and Eros Pitirim Sorokin and others An issue that often emerges in this literature is the question of the nature and definition of love A second annotated bibliography features current empirical research in the field of Personality and Altruism with a focus on social psychology Among the topics covered are the altruistic personality altruistic behavior empathy helping behavior social responsibility and volunteerism Methodologies are diverse and studies include experiments local and national surveys naturalistic observation and combinations of these The Evolutionary Biology annotated bibliography covers the most significant works on altruism and love in the field of biology and evolutionary psychology The fourth and final annotated bibliography in this volume is entitled Sociology of Faith Based Volunteerism Here the focus is on literature on the interface of helping behavior and religious organizations as well as major pieces on voluntary associations

Proceedings of the British Academy, Volume 117, 2002 Volume 117 of the Proceedings of the British Academy contains 13 lectures delivered at the British Academy in 2001 *The Myth of the Normal Curve* Curt Dudley-Marling, Alex Gurn, 2010 The Myth of the Normal Curve provides a much needed critique of commonly and even scientifically accepted notions of normality For too long we have supported an ideology of normality without much interrogation of the subject This book provides that interrogation Lennard J Davis Professor of English and Disability Studies University of Illinois at Chicago Book Jacket *Darwin and the Novelists* George Levine, 1991 The Victorian novel clearly joins with science in the pervasive secularizing of nature and society and in the exploration of the consequences of secularization that characterized mid Victorian England p viii The Retreat of Scientific Racism Elazar Barkan, 1992 This fascinating study in the sociology of

knowledge documents the refutation of scientific foundations for racism in Britain and the United States between the two World Wars when racial differences were no longer attributed to cultural factors Professor Barkan considers the social significance of this transformation particularly its effect on race relations in the modern world Discussing the work of the leading biologists and anthropologists who wrote between the wars he argues that the impetus for the shift in ideologies came from the inclusion of outsiders women Jews and leftists who infused greater egalitarianism into scientific discourse But even though the emerging view of race was constrained by a scientific language he shows that modern theorists were as much influenced by social and political events as were their predecessors

Contemporary Environmental Politics Piers Stephens, John Barry, Andrew Dobson, 2006-09-27 This new collection from the leading journal Environmental Politics presents an excellent overview of the key themes found in contemporary green political thought since the early 1990s Bringing together the journal's major work this new book charts a fascinating period in which environmental politics developed from a marginal position in society and the academy to its current place in the intellectual mainstream Subdivided into clear sections on political theory social movements political economy and policy questions and assisted by a contextualising introduction this volume focuses on a set of clear themes the character of green political theory relationships with other political traditions and theories origins and dynamics of contemporary environmental politics differences similarities and tensions between the North and South the relationship of environmentalism to market economics and ecological modernization environmental aspects of distributive justice at the local national and global levels the roles value and valuing of nature in green theory and institutional practice As a compilation this book is unique It delivers a snapshot of a variety of issues in the field and is therefore ideally suited to teaching purposes especially at postgraduate level In addition as each section is chronologically arranged an evolution of related ideas can be clearly seen and appreciated which builds an excellent understanding of the field of environmental politics
