original work of anthropology combines extensive ethnographic fieldwork and investigative journalism to explain how
security is understood experienced and constructed along the Triple Frontera the border region shared by Argentina Brazil
and Paraguay One of the major hot borders in the Western Hemisphere the Triple Frontera is associated with drug and
human trafficking contraband money laundering and terrorism It s also a place where residents particularly on the Argentine
side are subjected to increased governmental control and surveillance How does a scholar tell a story about a place
characterized by illicit international trading rampant violence and governmental militarization Jusionyte inventively centered
her ethnographic fieldwork on a community of journalists who investigate and report on crime and violence in the region
Through them she learned that a fair amount of petty small scale illicit trading goes unreported a consequence of a
community invested in promoting the idea that the border is a secure place that does not warrant militarized attention The
author s work demonstrates that while media is often seen as a powerful tool for spreading a sense of danger and uncertainty
sensationalizing crime and violence and creating moral panics journalists can actually do the opposite Those who selectively
report on illegal activities use the news to tell particular types of stories in an attempt to make their communities look and
ultimately be more secure **Science Fiction Book Review Index, 1974-1979** Halbert W. Hall, 1981 **Looking
