Tanganyika Preplanning:

Tanganyika Fred G. Burke, Bertram M. Gross, 1965 **The Political Economy of Tanzania** Michael F.

Lofchie, 2014-01-16 Since gaining independence the United Republic of Tanzania has enjoyed relative stability. More recently the nation transitioned peacefully from single party democracy and socialism to a multiparty political system with a market based economy. But Tanzania's development strategies based on the leading economic ideas at the time of independence also opened the door for unscrupulous dealmaking among political elites and led to economic decline in the 1960s and 1970s that continues to be felt today. Indeed the shift to a market oriented economy was motivated in part by the fiscal interests of government profiteers. The Political Economy of Tanzania focuses on the nation's economic development from 1961 to the present considering the global and domestic factors that have shaped Tanzania's economic policies over time. Michael F. Lofchie presents a compelling analysis of the successes and failures of a country whose postcolonial history has been deeply influenced by high ranking members of the political elite who have used their power to advance their own economic interests. The Political Economy of Tanzania offers crucial lessons for scholars and policy makers with a stake in Africa's future.

External Research List, 1966 Area Handbook for Tanzania Allison Butler Herrick, 1968 **Development and**

Planning in Tanzania Abdul Khakee, 1970 Revised version of a thesis on problems of economic development and social change in Tanzania analysed in the context of national planning examines the organisational and administrative aspects and methodology of planning analyses actual government policies using statistical tables available in annual budgets and other official documents and examines measures taken for the implementation of plans and problems of statistical method. Bibliography pp 120 to 123 and map **Planning and Budgeting in Poor Countries** Naomi Caiden, Aaron B.

Wildavsky, 1980-01-01 This substantial treatment of budgeting in poor countries and discussion of the relationship between planning and budgeting covers over eighty nations and three fourths of the world's population. While there are many treatments of planning the approach of this study is radically different. The authors argue that the requisites of comprehensive economic planning do not exist in poor countries and that in the effort to create them planners merge into the environment they have set out to change. Caiden and Wildavsky provide a unique and thorough examination of planning and budgeting by governments of poor countries throughout the world and recommend reforms that are workable and realistic for these countries. They analyze the political economic and social developments that influence budgeting and planning in developing countries. **Unpublished Research on Africa, Completed and in Progress** United States Department of State. Planning Processes Rolf E. Vente, 1970 **The State of the Nations** Michael F. Lofchie, 2024-06-21 The State of the Nations is a collection of essays evaluating the political social and economic development of independent African states in the 1960s The effort to employ the notion of constraint as a conceptual tool in analyzing African politics reflects an attempt to move away from evaluative terms such as development and modernization or decay and breakdown Development which has an implicit suggestion of social progress and constitutional government seems inappropriate for the study of the wide array of political phenomena found in African states Terms such as breakdown and decay with an equally broad suggestion of disruption disunity and instability seem equally inappropriate The vantage point of the authors in this volume is primarily political but their understanding of African development encompasses the social and economic spheres as well The constraints that impede achievement of African objectives are varied and many of course are not political Geographical factors for example are supremely relevant in accounting for the availability of natural resources The principal justification for emphasizing political rather than other constraints is the extent to which political will and political action can stimulate development in spite of other obstacles Contributors Jonathan Barker Henry Bienen Barbara Callaway Emily Card Martin R Doornbos Rupert Emerson R Cranford Pratt Richard E Stryker Immanuel Wallerstein Claude E Welch M Crawford Young This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1971
