Globalized Sport Management in Diverse Cultural Contexts James J. Zhang, Brenda G. Pitts, 2019-04-05. Cross-cultural management is an important facet of the globalized sport industry. Sport managers must be skilled at working with individuals from diverse cultures and aware of the key issues affecting sport on a global level. This book brings together cutting-edge research from leading sport scholars from around the world to illuminate some of those important issues and to demonstrate what cross-cultural management looks like in a sporting context. Presenting case studies from countries as diverse as the US, Brazil, Poland, and Venezuela, and across a range of sports from football to basketball, the book presents new empirical material derived from a range of inquiry protocols, including both qualitative and quantitative methods. It offers critical analyses of cross-cultural and managerial issues in key areas such as group cohesiveness, group communications, and misperception and misinterpretation. Making an important contribution to our understanding of both theory and practice in sport management, this book is fascinating reading for any student, researcher, or practitioner with an interest in global and international sport.

System-wide Efforts to Improve Student Achievement Kenneth K. Wong, Stacey Rutledge, 2006-03-01. Strong system-wide support is increasingly being identified as playing an important role in policy efforts aimed at increasing student achievement. Hightower, Knapp, March, and McLaughlin (2002). Yet current research often views district and other system-wide support as largely governance changes without substantive linkage to school improvement outcomes. Cuban and Usdan (2003). In this volume, we seek to deepen our understanding of the role of school districts and system-wide initiatives through a series of case studies that focus on how school districts and system-wide actors facilitate policy innovation and reform initiatives that are designed to improve student achievement. Through both quantitative and qualitative studies from diverse settings across the country, chapters in this volume examine the role of instructional technology, alternative accountability practices, management and partnership reforms, and school improvement efforts through new incentive and support practices. While challenges remain, these case studies demonstrate how districts support and facilitate school change aimed at
