over official authorities through public opinion.²⁰ "It is in the free and open public sphere that social movements acquire a public voice, fight for recognition, assert themselves, seek to shape public opinion, influence leaders and policy makers, and bring about change."²¹ Good and accountable governance builds upon a free flow of information, free expression, and free discussion of matters of political concern.

Actors in the Public Sphere

- **The public**—The traditional understanding of the public refers to an imaginary group of people that are connected through their mutual interest in one or several issues of public concern. The members of the public need not be located in the same place. In contemporary social science, the term is often equated with politically relevant groups of citizens, for instance the electorate, civil society, local communities, or mass media audiences.²²
- **Civil society**—Civil society and the public are closely related, but conceptually not synonymous. Civil society is constituted by organizations and activities that have no primary political or commercial character, and are not motivated by profit or power.²³ Under certain circumstances they can become part of the public sphere.²⁴
