Site Buildings And Spaces:

Toward a Comprehensive Landscape Plan for Washington, D.C. Wallace, McHarg, Roberts, and Todd, United States. National Capital Planning Commission, 1967 A Green Vitruvius Vivienne Brophy, J Owen Lewis, 2012-06-25 2000 years ago the roman architect Marcus Vitruvius Pollio wrote the ten books on architecture establishing the concept of the pattern book offering design principles and solutions that is still referred to in every architect's education A Green Vitruvius is intended as a green pattern book for today Now fully updated this well established textbook provides advice suitable for undergraduate and post graduate students on the integration of sustainable practice into the design and construction process the issues to be considered the strategies to be adopted the elements of green design and design evaluation within the process Classic design elegance is found in the holistic clear solution **Sites for Public Buildings at Huntington, W.Va., Omaha, Neb., and Portland, Ore. Hearings ... Subcom. on Public Buildings and Grounds ... on H.R. 3506, 4836, 4967** United States. Congress. House. Committee on Public Works, 1948 Space and Time in Mediterranean Prehistory Stella Souvatzi, Athena Hadji, 2013-10-15 Space and Time in Mediterranean Prehistory addresses these two concepts as interrelated rather than as separate categories and as a means for understanding past social relations at different scales The need for this volume was realised through four main observations the ever growing interest in space and spatiality across the social sciences the comparative theoretical and methodological neglect of time and temporality the lack in the existing literature of an explicit and balanced focus on both space and time and the large amount of new information coming from prehistoric Mediterranean It focuses on the active and interactive role of space and time in the production of any social environment drawing equally on contemporary theory and on case studies from Mediterranean prehistory Space and Time in Mediterranean Prehistory seeks to break down the space time continuum often assumed rather than inferred into space time units and to uncover the varying and variable interrelations of space and time in prehistoric societies across the Mediterranean The volume is a response to the dissatisfaction with traditional views of space and time in prehistory and revisits these concepts to develop a timely integrative conceptual and analytical framework for the study of space and time in archaeology *Beazley's Design and Detail of the Space Between Buildings* A. Pinder, 2003-09-02 A new edition of a book widely regarded as a classic of landscape architecture it deals with the bits that go in between the different parts of the urban landscape A completely updated text makes it suitable for both the professional and student US Patent and Trademark Office Consolidation , 1999 **Public Buildings Reform Act of 1995** United States. Congress. Senate. Committee on Environment and Public Works. Subcommittee on Transportation and Infrastructure, 1996 **Eco-Design of Buildings and Infrastructure** Bruno Peuportier, Fabien Leurent, Jean Roger-Estrade, 2020-12-22 The Chair Eco design of buildings and infrastructure a partnership between three engineering colleges MINES ParisTech Ecole des Ponts ParisTech and AgroParisTech and the VINCI group aims to create measurement and simulation tools which integrate all the dimensions

of eco design greenhouse gas emissions impact on biodiversity and resource levies etc to become real decision making tools based on a scientific approach for all actors in the city designers builders and users This book reviews the second five year sequence of the Chair first presenting methodological advances in eco design life cycle assessment and quantification of uncertainties local environmental impacts of transport and biodiversity The interdisciplinary partnership also associating the human sciences shows its interest in taking into account the human factor in the modelling of urban systems This modelling is based on several numerical simulation tools presented in the third part This theoretical set results in more substantial proposals for the renewal of techniques and systems in terms of energy management strategies in buildings urban agriculture participatory data collection and digital transformation in transport This book is intended for urban planners local authorities building owners architects design offices companies building managers teacher researchers and anyone interested in the environmental quality of our living spaces
