terms and its usefulness in the study of primates *Primate Ontogeny, Cognition and Social Behaviour* Phyllis C. Lee, James G. Else, 1986-07-25 This volume presents a comprehensive review of the current research in the field of primate thinking learning and behavioural development Recent theories of the ways in which primates perceive their world are integrated with the ways that they behave and communicate about each other and their environment Many different species in both the wild and in captivity are discussed with coverage from the social development of neonates to the behaviour of adults The common theme to the contributions is an attempt to understand how primates perceive learn about and manipulate their social and physical environment **The Social Life of Monkeys and Apes** Solly Zuckerman, Solly Baron Zuckerman, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company **How Monkeys See the World** Dorothy L. Cheney, Robert M. Seyfarth, 2024-05-31 Cheney and Seyfarth enter the minds of vervet monkeys and other primates to explore the nature of primate intelligence and the evolution of cognition This reviewer had to be restrained from stopping people in the street to urge them to read it They would learn something of the way science is done something about how monkeys see their world and something about themselves the mental models they inhabit Roger Lewin Washington Post Book World A fascinating intellectual odyssey and a superb summary of where science stands Geoffrey Cowley Newsweek A once in the history of science enterprise Duane M Rumbaugh Quarterly Review of Biology Social Behavior of Rhesus Monkeys Reared with Varying Degrees of Early Peer Experience Charles Low Pratt, 1968 *Behavior of Nonhuman Primates* Allan M. Box, 2012-12-06 One of the most obvious changes that has occurred in behavioural biology in recent years is that it has become conspicuously a problem orientated subject Moreover one of the most important consequences of this has been to stimulate interdisciplinary links between evolutionary biology zoology ecology anthropology and psychology The time is now right to ask questions which relate whole animals in the contexts of their ecosystems with their social behaviour and development with their perceptual

and cognitive capacities These are new ways of looking at old problems but we are still at the stage of finding out what kinds of questions to ask For several years now I have been involved in teaching behavioural biology to students of psychology as well as zoology and have greatly appreciated the opportunity to relate material across many different subject areas It is the interfacing of problems as in ecology and psychology for example that makes more sense of topics such as intelligence responses to novelty feeding strategies and social learning The aim of the book is to provide readily digestible information in a number of areas of current interest in behavioural biology Above all it is intended to provide a basis for discussion and further inquiry
