**Politics in Time** Paul Pierson, 2011-09-19 This groundbreaking book represents the most systematic examination to date of the often invoked but rarely examined declaration that history matters Most contemporary social scientists unconsciously take a snapshot view of the social world Yet the meaning of social events or processes is frequently distorted when they are ripped from their temporal context Paul Pierson argues that placing politics in time constructing moving pictures rather than snapshots can vastly enrich our understanding of complex social dynamics and greatly improve the theories and methods that we use to explain them Politics in Time opens a new window on the temporal aspects of the social world It explores a range of important features and implications of evolving social processes the variety of processes that unfold over significant periods of time the circumstances under which such different processes are likely to occur and above all the significance of these temporal dimensions of social life for our understanding of important political and social outcomes Ranging widely across the social sciences Pierson s analysis reveals the high price social science pays when it becomes ahistorical And it provides a wealth of ideas for restoring our sense of historical process By placing politics back in time Pierson s book is destined to have a resounding and enduring impact on the work of scholars and students in fields from political science history and sociology to economics and policy analysis

***Societal Dynamics and Fragility*** The World Bank, 2012-10-12 Today s world is changing at breakneck speed shaking the very foundations of many societies Increased mobility through massive urbanization and migration allows people unprecedented access to different cultures and ideas advanced technologies speed the pace of human interaction the globalization of communication offers new forms of social relationships that may directly contradict traditional norms for behavior These changes create tremendous stresses on relationships in societies affecting the way youth interact with their elders the way women and men relate to each other how urban migrants and refugees relate to their new environments and so on The impacts of these changes are felt acutely in fragile situations where groups and institutions struggle to adapt to the stresses of rapid social change In the worst cases where fragility has given way to open violence people are more than twice as likely to be malnourished more than three times as likely to be unable to send their children to school twice as likely to see their children die before age five and more than twice as likely to lack clean water In addition to these domestic challenges the costs of fragility often spill over to neighboring regions in the form of trafficking in illegal goods and persons corruption and violence Societal Dynamics and Fragility frames a fresh approach to these challenges by focusing on improving relationships across groups and institutions in society Drawing on case studies from Yemen Central African Republic Haiti Liberia and Aceh Indonesia the

**Freedom, Equality, and the Market** Barry Hindess, 1987 This new textbook for students of social theory considers the role of public intervention in social and economic processes It is a clear critical discussion of different theoretical and political perspectives on social policy Barry

Hindess begins with the consensus view shared by senior politicians civil servants and academics throughout much of the postwar period This view depends on two beliefs in the capacity of government to manage the economy and in the development of a qualitatively new relationship between the state and the population The first is discussed in relation to Crosland's *The Future of Socialism* and the second in relation to Marshall's conception of citizenship and Titmuss's account of social policy The consensus view generated serious objections and Hindess examines two in particular One is the argument that the view itself causes a destructive competitive struggle between sectional interests for state intervention in their favour The other from the left is that what Tawney called the strategy of equality has failed and that a more radical attack on inequality is required The remaining section looks at the Marxist and liberal alternatives to the consensus view In conclusion the author discusses firstly the essentialism of the market both in consensus and in very different ways in liberal and Marxist thought and secondly the place of principles such as freedom and equality in political discussion and the analysis of social conditions He shows that market and plan are not necessarily incompatible Freedom Equality and the Market with its careful assessment of the key texts will be important reading for undergraduate students of sociology and social policy
