The Bottom Line Inside Accounting Today:

The Bottom Line Grace W. Weinstein, 1987 **Insights from Accounting History** Stephen Zeff, 2010-06-10 Stephen Zeff has been a prolific researcher on the history of accounting and auditing in the twentieth century. He has written numerous papers on the history of standard setting and regulation of accounting and auditing practice of the accounting profession of accounting thought and of the intellectual contributions of major authors such as Hatfield Canning Paton and MacNeal. This volume brings together the greatest hits of Zeff's academic career including several articles that were published in out of the way places for easier use by students and researchers of the field. In an introduction Zeff discusses the evolution of his research interests and explains the factors led to the writing of the papers and their intended contribution to the literature. The book also includes a complete list of his publications. **Encyclopedia of Business and Professional Ethics** Deborah C. Poff, Alex C. Michalos, 2023-05-24 This encyclopedia edited by the past editors and founder of the Journal of Business Ethics is the only reference work dedicated entirely to business and professional ethics. Containing over 2000 entries, this multi-volume major research reference work provides a broad-based disciplinary and interdisciplinary approach to all of the key topics in the field. The encyclopedia draws on three interdisciplinary and overlapping fields: business ethics, professional ethics, and applied ethics, although the main focus is on business ethics. The breadth of scope of this work draws upon the expertise of human and social scientists as well as that of professionals and scientists in varying fields. This work has come to fruition by making use of the expert academic input from the extraordinarily rich population of current and past editorial board members and section editors of and contributors to the Journal of Business Ethics. **New Organizational Designs** Bob Truica, 1999-05-12 The organizational world today has been characterized in various terms: turmoil, chaos, the age of paradox, and unreason. Common to all these characterizations is that the conventional wisdom fails in responding to novel challenges triggered by the pervasive and radical change of organizations. Information, knowledge, information worker, and information technology are at the epicenter of these changes and surprises. This book explores new organizational designs such as the network and virtual organization from the information perspective. In addition, proposed is a model of the nontraditional organization in which information work evolves around teams that directly serve customers. This model was put on a test and elements of the nontraditional organization were identified in firms that have been around for quite some time: the public accounting industry and specifically its technologically most advanced segment. The book aims at transferring experience and facilitating interest for methods of organizing suitable for the information age. **Setting Standards for Financial Reporting** A. Bowdoin Van Riper, 1994-07-21 The book begins with an overview of how and why the present self-regulatory arrangement for setting standards for financial reporting in the private sector came about in 1973. A brief description of the new structure is followed by a discussion of the essential elements of meaningful self-regulation. A schism emerged between advocates of neutrality and objectivity in standard setting and those who think the primary concern should

be for possible economic and social consequences Early clashes between traditional views and newer insights are described setting the stage for an account of serious resistance to change Powerful interests mount determined efforts to thwart the standard setters undercutting not only self regulation but also the intent of the federal securities acts of 1933 and 1934 The practical and philosophical bases for the opposing views are examined and recommendations are presented for ensuring continuation of private sector standard setting despite the intensity of these views Understanding Organizations in

Complex, Emergent and Uncertain Environments Anabella Davila,Marta Elvira,Jacobo Ramirez,Laura Zapata-Cantu,2012-06-07 Explores the concept of complexity and analyses how organizational governance can contribute to environmental sustainability A common theme in these chapters is that organizations actively engage with their environments Consequently organizational responses are partly the result of iterative processes with the environment
