Daggar, 2022-09-20 Cultivating Empire charts the connections between missionary work capitalism and Native politics to understand the making of the American empire in the late eighteenth and early nineteenth centuries It presents American empire building as a negotiated phenomenon that was built upon the foundations of earlier Atlantic empires and it shows how U S territorial and economic development went hand in hand Lori J Daggar explores how Native authority and diplomatic protocols encouraged the fledgling U S federal government to partner with missionaries in the realm of Indian affairs and she charts how that partnership borrowed and deviated from earlier imperial missionary partnerships Employing the terminology of speculative philanthropy to underscore the ways in which a desire to do good often coexisted with a desire to make profit Cultivating Empire links eighteenth and early nineteenth century U S Indian policy often framed as benevolent by its crafters with the emergence of racial capitalism in the United States In the process Daggar argues that Native peoples wielded ideas of philanthropy and civilization for their own purposes and that Indian Country played a critical role in the construction of the U S imperial state and its economy Rather than understand civilizing missions simply as tools for assimilation then Cultivating Empire reveals that missions were hinges for U S economic and political development that could both devastate Indigenous communities and offer Native peoples additional means to negotiate for power and endure
