

Marxist Theory of Social Change:A Scientific Interpretation

Taslima Akter

Introduction

Marxism is the philosophy of social change.In that sense it can be considered to be a philosophy of praxis.Though Marx did not establish any specific philosophical theory,in his writings he did not simply explain the world but also provided guidelines to change it.The theory of social change is one of the most important theories of Marx's philosophy. He established the theory of social change on the basis of his materialistic conception of history, generally known as 'Historical Materialism'.He enriched eighteenth century materialism with the achievements of Classical German philosophy, especially of Hegel's system, which in its turn had led to the materialism of Feuerbach.

Marx provided the scientific explanation of social change and development. He believes that there are some objective laws by which we can explain social change and development.These laws are universal and independent of man's will.According to Marxism, humans are born and grown up in a specific production system. He participates in the production system and builds production relations for his material needs. On the basis of mode of production and the relation of production, other social relations;i.e.; political, legal, moral, etc. take shape.So, the determining force of social change is the production of material wealth.That is to say, economic activity is the basis of social change and development. In this regard he discusses the very nature of the existing capitalist system which is based on disparity.He analyses relation of production from which surplus production emerges.Surplus production creates surplus values which leads to the ownership of private property.Because of the ownership of private property social inequality arises and class conflict become distinct.Gradually,people become class conscious and as a result class philosophy arises.After certain time,through inevitable revolution capitalist system abolished and a socialist society established.

Marxist Thought About Social change

Pre-Marxist sociologists were divided about the development and change of society. Some of them bring supernatural or divine beings in order to explain social development. On the other hand, many tried to explain social development logically and scientifically by cause-effect relationship.

Karl Marx defended philosophical materialism which has been proved to be the only philosophy consistent and true to all the teachings of natural science.He formulated the materialistic concept of history.Marx and Engels repeatedly explained that every deviation from materialism is erroneous.³They introduce 'historical materialism' in *The German ideology* (1903), which is based on dialectical materialism.Historical materialism is the materialist interpretation of history.According to idealist,the consciousness of man determines their social being.But the main premise of historical materialism is that social consciousness does not determine social being rather social being determines social consciousness.Marx's social theory is revolutionary:

Understanding Social Change Anthony F. Heath, John Ermisch, Duncan Gallie, British Academy, 2005-02-17 These essays not only describe the major changes in British society in recent years but seek to understand and explain what is happening They consider the wide variety of mechanisms that underlie these changes in particular processes of social interaction The ill understood nature of these mechanisms may be a major reason why so much social reform has proved ineffective By highlighting the complexities of the causal mechanisms sociological research can make a major contribution to policy and public debate While these papers do not claim that sociology will provide all the answers they demonstrate that it has made real progress in understanding the social changes that Britain has experienced in recent decades

The Robotics Divide Antonio López Peláez, 2013-08-13 Societies survive in their environment and compete with each other depending on the technology they develop Economic military and political power are directly related to the available technology while access to technology is key to the well being of our societies at the individual community and national level The Robotics Divide analyzes how robotics will shape our societies in the twenty first century a time when industrial and service robotics particularly for military and aerospace purposes will become an essential technology The book written by experts in the field focuses on the main technological trends in the field of robotics and the impact that robotics will have on different facets of social life By doing so the authors aim to open the black box of a technology which like any other is designed implemented and evaluated according to the economic and cultural patterns of a cosmopolitan society as well as its relations of power The Robotics Divide explores future developments in robotics technology and discusses the model of technological development and the implementation of robotics in this competitive market economy Then the authors examine to what extent it is possible to determine the characteristic features of the robotic divide namely in what ways the robotic divide differs from the digital divide and how a model to integrate this technology can be developed without reproducing patterns of inequality and power that have characterized the advent of previous technologies These issues inequality robotics and power are of concern to robotics and advanced automation engineers social scientists economists and science policy experts alike
