Social And Biological Roles Of Language The Psychology Of Justification:

Social and Biological Roles of Language Richard Totman, 1985 This volume is an integrative theoretical exploration of the essential links between a person's social adaptation and his or her biological survival Language and speaking practices are thought to be closely tied in with social phenomena and so too the discussion of the way people use words runs through the analysis of the nature of stress and its physiological effects The ideas developed have implications both for our understanding of what stress involves and for the psychology of individuals and communities FROM THE PREFACE One of the exciting things about contemporary social psychology is that its discussions seem to be entering more cosmopolitan ground Traditional research programmes have been justly criticised for their insularity because of the incommensurability of their categories and distinctions researchers do not talk to each other This book is written in the hope that the days of insularity may be coming to an end and that the way is open to a sharing of debates about matters of social importance among those schooled in different academic subjects It is divided into three parts In the first part the social psychologist's title to a specialist vocabulary and methodology is questioned and the assumption that research based on an ideal of specialism can in principle reflect general social laws and truths is challenged The more theoretically constructive project of the book begins with Part II The argument is developed that theories in social psychology have evolved not as a result of specialist research programmes but on different grounds Their course has more to do with a changing metaphysics than with data specifically a changing perspective on men and women as rational freely choosing moral agents Relatedly our conception of what is meant by social has changed too

Emotions in Command Frank K. Salter, 2017-09-08 This book is part of a quest for a general theory of organizations valid in all cultures Central to Frank Salter's investigation is the question of social power why people obey their superiors His approach is to locate the nature of organizational power in the behavioral details of hierarchical interactions in the institutional settings in which they occur

Language Typology and Language Universals Martin Haspelmath, 2001 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness

theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this *modus operandi* is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume

The Myth of Social Action Colin Campbell,1998-07-09 The Myth of Social Action first published in 1996 is a powerful critique of the sociology of the time and a call to reject the prevailing orthodoxy Arguing that sociological theory had lost its way Colin Campbell mounts a case for a new dynamic interpretivism a perspective on human conduct which is more inkeeping with the spirit of traditional Weberian action theory Discussing and dismissing one by one the main arguments of those who reject individualistic action theory he demonstrates that this has been wrongly rejected in favour of the interactional social situationalist approach now dominating sociological thought

The Rupture Olivia Fane,John B. Harris,2020-10-08 The sublime rests precariously on the edge of the abyss This volume is a collaboration between wordsmith Olivia Fane and painter John B Harris Fane s first essay is on the philosophical understanding of the sublime The sublime first became a subject of serious philosophical thought in the eighteenth century thanks to Edmund Burke and Immanuel Kant Fane argues for an interpretation of the sublime as the radically other and argues that its function is primarily epistemological in that it reveals to us our own being and finitude She goes on to show how this tallies with ideas of negative theology and post modernism In her second chapter A Short Essay on Truth Fane suggests that societies and cultures suffer from a hermeneutic circle of knowledge in other words knowledge is based on agreement rather than authentic understanding She shows how the function of art and religion at their best is to attempt to break through the circle

turning us from sleepwalkers into people who are alive to a truth which is paradoxically unknowable The third chapter Fear and Longing A Symposium is named after the painting on the book s cover and is a dialogue between Harris and Fane on the apprehension of the sublime exploring the syzygy between images and words intimation and explication
