The Biological Basis Of Human Freedom:

The Biological Basis of Human Freedom Theodosius Grigorievich Dobzhansky, 1956 *The Biological Basis of Human Freedom* Theodosius Grigorievich Dobzhansky, 1969 **The Biological Basis of Human Freedom** Theodosius Dobzhansky, 1900-1975, 1960 **The Biological Basis of Human Freedom. (Page-Barbour Lectures for 1954 at the University of Virginia.).** , 1956 Creatures of Cain Erika Lorraine Milam, 2018-12-11 How Cold War America came to attribute human evolutionary success to our species unique capacity for murder After World War II the question of how to define a universal human nature took on new urgency *Creatures of Cain* charts the rise and precipitous fall in Cold War America of a theory that attributed man's evolutionary success to his unique capacity for murder Drawing on a wealth of archival materials and in depth interviews Erika Lorraine Milam reveals how the scientists who advanced this killer ape theory capitalized on an expanding postwar market in intellectual paperbacks and widespread faith in the power of science to solve humanity's problems even to answer the most fundamental questions of human identity The killer ape theory spread quickly from colloquial science publications to late night television classrooms political debates and Hollywood films Behind the scenes however scientists were sharply divided their disagreements centering squarely on questions of race and gender Then in the 1970s the theory unraveled altogether when primatologists discovered that chimpanzees also kill members of their own species While the discovery brought an end to definitions of human exceptionalism delineated by violence Milam shows how some evolutionists began to argue for a shared chimpanzee human history of aggression even as other scientists discredited such theories as sloppy popularizations A wide ranging account of a compelling episode in American science *Creatures of Cain* argues that the legacy of the killer ape persists today in the conviction that science can resolve the essential dilemmas of human nature Initiative: Human Agency and Society , If however we possess the capacity to take the initiative and determine on our own some of what we do then we are responsible and often culpable when we act Consequently ethics and law become bona fide concerns in our lives and the implications are everywhere in evidence in personal relations politics criminal law social work and public policy **Human Technological Enhancement and Theological Anthropology** Victoria Lorrimar, 2022-05-05 A cross disciplinary theological engagement with proposals for the technological enhancement of humans including radical life extension mind uploading mood enhancement and moral enhancement This work draws on metaphor studies cognitive sciences and literary studies to develop an account of human creativity in relation to divine creativity The Body of Raphaelle Peale Alexander Nemerov, 2001-03-12 This book is mind blowing Nemerov is a groundbreaking thinker in his field John Wilmerding Princeton University This is a book for all serious Americanists Jay Fliegelman author of *Declaring Independence* Each haunting and delicately wrought canvas expands as Nemerov writes about it so that his interpretive work both mirrors and supplements the wondrous intensity of the paintings themselves Ellen Handler Spitz *Museums of the Mind* Underneath their apparent simplicity Raphaelle Peale's still lifes glow

mysteriously in the dark light of their making Peale transformed the common items of the early nineteenth century kitchen and market into explorations of the American unconscious Now writing as coolly and lucidly as Peale painted Alexander Nemerov has unpeeled those still lifes in a tour de force of formalistic analysis Through close interrogation of these small hermetic images Nemerov's book reveals the whole world of early America in the process bringing us as close as possible to the genius of Raphaelle Peale David C Ward National Portrait Gallery Smithsonian Institution This is a dazzling study lively and imaginative of an important body of work Nemerov's novel arguments regarding still life in general and Raphaelle Peale in particular reveal much about the art the man and the times It is a thoughtful and provocative book certain to generate interest and debate Charles C Eldredge Hall Distinguished Professor of American Art and Culture University of Kansas A triumph of interpretation Not since Michael Fried's groundbreaking account of Thomas Eakins has a critic so reimagined the very terms by which we see painting Nemerov's account singlehandedly catapults a painter we had previously considered to be interesting but minor into the forefront of discussions about American art during the early National Period The Body of Raphaelle Peale will no doubt spark the beginning of an exciting revival of scholarship in American Romantic painting Bryan J Wolf author of Romantic Re Vision

The Quest for the Inner Human Steven H. Propp, 2013-12-03 Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that we've all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldn't normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves
