The Biology And Evolution Of Lungfishes:

The Biology and Evolution of Lungfishes William E. Bemis, Warren W. Burggren, Norman E. Kemp, 1987 The Biology and Evolution of Lungfishes William E. Bemis, Warren W. Burggren, Norman E. Kemp, 1987-05-05 Presents competing hypotheses on dipnoan tetrapod relationships reflecting a controversy dating back 140 years Begins with a historical overview of the discovery and classification of the lungfish and succeeding developments in research and includes a reference list of species of fossil and living dipnoans Then thoroughly examines the origin structure and relationships of Paleozoic Dipnoi the structure and development of the dermal skeleton and the relationship of lungfishes to other groups of vertebrates The work also includes review articles on natural history feeding mechanisms neuroanatomy and many other related topics closing with suggested directions for future research Its fully indexed bibliography contains more than 2 000 publications The Biology of Lungfishes Jorden Morup Jorgensen, Jean Joss, 2016-04-19 The Biology of Lungfishes presents an up to date collection of reviews on some of the most important aspects of the life of lungfishes The book draws on contributions from well known experts with a long record of scientific work within their respective fields The general natural history of the three genera of lungfishes the fascinating fossil st **The biology of Latimeria chalumnae and evolution of coelacanth**s J.A. Musick, Michael N. Bruton, E.K. Balon, 2012-12-06 **The Physiology of Fishes, Second Edition** David H. Evans, James B. Claiborne, 1997-10-10 As in the bestselling first edition The Physiology of Fishes Second Edition is a comprehensive state of the art review of the major areas of research in modern fish physiology This Second Edition is entirely revised with 17 of the 18 chapters written by new authors It also includes four entirely new chapters **Adaptive Function and Brain Evolution** Agustín González, Fernando Martínez-García, Luis Puellas, Hans J Ten Donkelaar, 2014-10-27 The brain of each animal shows specific traits that reflect its phylogenetic history and its particular lifestyle Therefore comparing brains is not just a mere intellectual exercise but it helps understanding how the brain allows adaptive behavioural strategies to face an ever changing world and how this complex organ has evolved during phylogeny giving rise to complex mental processes in humans and other animals These questions attracted scientists since the times of Santiago Ramon y Cajal one of the founders of comparative neurobiology In the last decade this discipline has undergone a true revolution due to the analysis of expression patterns of morphogenetic genes in embryos of different animals The papers of this e book are good examples of modern comparative neurobiology which mainly focuses on the following four Grand Questions a How are different brains built during ontogeny b What is the anatomical organization of mature brains and how can they be compared c How do brains work to accomplish their function of ensuring survival and ultimately reproductive success d How have brains evolved during phylogeny The title of this e book Adaptive Function and Brain Evolution stresses the importance of comparative studies to understand brain function and the reverse of considering brain function to properly understand brain evolution These issues should be taken into account when using animals in the research of mental function

and dysfunction and are fundamental to understand the origins of the human mind *Origins of the Higher Groups of Tetrapods* Hans-Peter Schultze, Linda Trueb, 2018-10-18 This edited volume explores the various views on the origins of tetrapods amphibians reptiles birds and mammals views that agree or differ depending in part on how certain fossil animals are classified and which methodology is used for classification Eighteen chapters by an international group of paleontologists and neontologists here present current hypotheses emphasizing the kinds of data needed to answer controversial questions as well as the variety of solutions that emerge from different analyses of the same data set The book is arranged in five sections each of which contains an overview essay that either describes the development of various schools of thought regarding the origin of the tetrapod group in question or critically summarizes the arguments presented in the section The first section addresses the origins of tetrapods as a group focusing on lobe finned fishes and early tetrapods Next is a section dealing with amphibians followed by one on reptiles The fourth section concerns avian origins and the final section treats the origins and early diversification of mammals With an overall goal of stimulating critical evaluation by the reader rather than providing unequivocal answers this volume will be of particular interest to vertebrate paleontologists evolutionary morphologists and ichthyological herpetological avian and mammalian systematists **Respiratory Control** Dexter F. Speck, Michael S. Dikin, W. Robert Revellette, Donald A. Frazier, 2021-12-15 Understanding of the respiratory control system has been greatly improved by technological and methodological advances This volume integrates results from many perspectives brings together diverse approaches to the investigations and represents important additions to the field of neural control of breathing Topics include membrane properties of respiratory neurons in vitro studies of respiratory control chemical neuroanatomy central integration of respiratory afferents modulation of respiratory pattern by peripheral afferents respiratory chemoreception development of respiratory control behavioral control of breathing and human ventilatory control Forty seven experts in the field report research and discuss novel issues facing future investigations in this collection of papers from an international conference of nearly two hundred leading scientists held in October 1990 This research is of vital importance to respiratory physiologists and those in neurosciences and neurobiology who work with integrative sensory and motor systems and is pertinent to both basic and clinical investigations **Respiratory Control** is destined to be widely cited because of the strength of the contributors and the dearth of similar works **Respiratory Control** Dexter F. Speck, Michael S. Dikin, W. Robert Revellette, Donald A. Frazier, **History of the Coelacanth Fishes** Peter Forey, 1997-11-30 This book evaluates the reputation of the coelacanth presenting up to date accounts of the structure of fossil coelacanths and suggests a family history to show that there have been subtle but significant changes in coelacanth history
