Star: The Bird Who Inspired Mozart Mireille Messier, 2022-10-11 A chance encounter with a starling inspires Wolfgang Amadeus Mozart in this picture book based on a true story Star The Bird Who Inspired Mozart is based on the true story of how Wolfgang Amadeus Mozart one of the world's most remarkable musicians was inspired by one of the world's most unremarkable birds a starling In this charming picture book author Mireille Messier tells the story of a very special relationship and how it began with a chance musical encounter And Matte Stephens's playful art captures both the grandeur of 18th century Vienna and the budding unlikely friendship between a famous musician and a humble starling

Dark Companions of Stars P. Kamp, 2012-12-06 If you want to understand the invisible look careful at the visible The Talmud A bird's eye or rather a distant spacecraft's view of the solar system reveals an assembly of planets terrestrial giant and Pluto The orbital motions are in the same sense counter clockwise as seen from the north of the general flattened space within which the planetary motions are confined This state of affairs is corevolving and more or less coplanar The rotations are in the same sense as the revolutions with the striking exception of Uranus whose sense of rotation is perpendicular to its plane of revolution As time goes by most of the planets remain fairly close to a general plane and at no time stray unduly far from it they remain confined within a rather narrow box or disk with a large equatorial extent The most distant planet Pluto requires a diameter of some 80 astronomical units for the disk One astronomical unit is the distance of the Earth to the Sun to be more precise the length of half the major axis of the Earth's slightly elliptical orbit around the Sun and amounts to nearly 149600000 km
