The Birth Of The Cell:

The Birth of the Cell Henry Harris, 2000-01-01 Henry Harris here provides an account of how scientists came to understand that the bodies of all living things are composed of microscopic units that we now call cells. Harris turns to the primary literature, the original texts, scientific papers and correspondence of medical researchers involved in the formulation of the cell doctrine to reconstruct the events that enabled researchers to comprehend the nature and purpose of cells. Translating many of these documents into English for the first time, Harris uncovers a version of events quite different from that described in conventional science textbooks. Focusing on the scientific history of the genesis of the cell doctrine, the author also considers contemporary social and political contexts and shows how these influenced what experiments were undertaken and how the results were represented.

[Home Cell Group Explosion](#) Joel Comiskey, 2023-03-08 *Home Cell Group Explosion* 2023 version is the most researched and practical book ever written on cell group evangelism. Joel Comiskey traversed the globe to find out why certain churches and small groups are successful in reaching the lost. He found the answers and freely shares them within this volume. If you are a pastor or small group leader, you should devour this book. It will encourage you and give you simple practical steps for dynamic small group life and growth. My friend Joel Comiskey is a combination of a local church practitioner and a painstaking scholar. Joel spent hundreds of hours and thousands of dollars visiting eight of the highest visibility cell group churches to interview their leaders and record his findings. I love this book because it focuses on the multiplication of cells for the greatest evangelistic results. C. Peter Wagner, Author, Scholar and Church Growth Expert. Comiskey does not just describe what is happening in cell churches. He takes the next step and identifies in a step-by-step fashion how we can apply these principles in our churches. It is all here, everything we need to know to start and grow a cell group ministry. I am grateful to Dr. Comiskey for the time, effort, and research that has gone into producing this long-needed book. Richard Peace, Ph.D., Professor of Evangelism and Spiritual Formation, Fuller Theological Seminary. Joel and I shared many days in Bogota as this book was written. His grasp of cell church models is superior to any other person I have worked with. This book is a treasure of information for church planters and pastors wishing to transition to the cell model. Ralph W. Neighbour Jr., Author and Pioneer Church Planter.
