The Bittersweet Century Speculations On Modern Science And American Democracy

Dennis L. Soden

The Bittersweet Century Speculations On Modern Science And American Democracy:

The Bittersweet Century Paul N. Goldstene, 1989 In this book about science and politics Goldstene Collapse of liberal empire argues that the possibilities of democracy are inseparable from and dependent on scientific theory as opposed to the development of technology Paper edition not seen 10 95 Annotation copyrighted by Book News Inc Portland OR Thorstein Veblen and the Enrichment of Evolutionary Naturalism Rick Tilman, 2007 Tilman argues that evolutionary naturalism provides the philosophical foundations of Veblen's thought He links evolutionary naturalism to Veblen's aesthetics secular humanism sociology of control sociobiology and sociology of knowledge thereby initiating observations regarding the relationship of Veblen's own life to his thinking and his place as a cultural lag theorist Provided by publisher **Democracy and Its Enemies** Paul N. Goldstene, 2018-10-15 America it is often argued emerged from the Enlightenment It follows that the prevailing elements of politics in the United States are echoes of struggles among what is here referred to as the moderate Enlightenment the conservative Enlightenment and the radical Enlightenment These lead to conflicting political doctrines which variously address the fundamental questions of who should rule and why and how The outcome is a confusing m lunge of a tri partite civil war among those who claim the Enlightenment as their own This is accompanied by a long history of resistance to the Enlightenment itself a phenomenon which leads to deeper concerns Sometimes referred to as the Counter Enlightenment this has been largely expressed by the Romantic contentions of an authoritarian nationalism Indeed its most dramatic manifestations have been realized in fascism and Nazism In this manner they constitute a step back into the historical mist comprising a major attack on both reason and empiricism as the foundation of a scientific approach Out of this combination of limitation and possibility emanate the essential power configurations of the epoch yielding policies that are often perceived to be democratic either as threat or achievement Accordingly the book explores the actual substance of the democratic argument On this basis it contends that a progressive position necessitates a search for the material foundation of a more egalitarian pluralism as the only rational surrogate for majorities within a nation of enormous size population and the complexities of concentration that are beyond the reach of democracy in any literal sense This work is rooted in one of the major traditions that emerged from the Western world of the late eighteenth century Thus it is informed by the doctrinal contentions of people like Thomas Paine Samuel Adams and Thomas Jefferson As such it largely opposes a tradition that flows from the writings of Adam Smith John Adams and James Madison and even more so to that associated with Edmund Burke Alexander Hamilton and John Marshall Its focus is on how these ideas play out in a world wherein a generic fascism is also a major theme always looming *Journal of Third World Studies*, 1993 Consists of abstracts of selected papers from various conferences dealing with the third world and its problems *America, History and Life*, 1991 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide **Thorstein Veblen, John Dewey, C. Wright Mills and the Generic**

Ends of Life Rick Tilman, 2004-02-12 Although Veblen Dewey and Mills disagreed on a number of points Rick Tilman shows how these thinkers forged an authentic coherent and original tradition of critical social science in the United States By comparing their views on a number of timely issues such as aesthetics feminism and gambling the author shows how their tradition is vibrantly relevant in the new millenium
