Wickham-Crowley,2018-06-26 In this comparative survey of guerrilla movements in Latin America Timothy Wickham Crowley explores the origins and outcomes of rural insurgencies in nearly a dozen cases since 1956 Focusing on the personal backgrounds of the guerrillas themselves and on national social conditions the author explains why guerrillas emerged strongly in certain countries but not others He considers for example under what circumstances guerrillas acquire military strength and why they do or do not secure substantial support from the peasantry in rural areas **Guide to American Foreign Relations Since 1700** Richard Dean Burns,1983 Designed to supplement the Guide to the Diplomatic History of the U S 1935 this bibliography has items arranged chronologically geographically and topically while indexes refer to authors subjects and individuals In addition to maps the book contains a list of major policy makers since 1781 and brief biographical sketches of U S secretaries of state ISBN 0 87436 323 3 87 50 **Fiscal Policy and the Natural Resources Curse** Paul Mosley,2017-02-17 It is widely accepted that natural resource wealth especially in the form of oil and minerals can be a key

factor in inhibiting economic development Many of the countries that are richest in natural resources including oil metals and diamonds are amongst the world's poorest Why Fiscal Policy and the Natural Resources Curse re examines this ancient unsolved puzzle asking why many governments of natural resource intensive countries are incapable in a globalised world of dealing with the natural resource curse This book offers a detailed analysis of the power relationships which underpin the natural resource curse using both statistical analysis and country case studies from Africa and Latin America to pinpoint the strategies that have enable developing countries to break out of the poverty trap The book differs from other works on this subject as it not only identifies the issues at stake but also offers solutions in the form of a series of suggested policy measures The work focusses in particular on fiscal escape routes namely measures to develop and diversify the tax system and to reallocate and target public expenditure This volume will be of great interest to scholars of economic development the economics of natural resources and economic growth as well as all those with an interest in development global politics and anti poverty policies
