

The Black Fens

Ian D Rotherham

The Black Fens:

The Fens Francis Pryor, 2019-07-11 A BBC Radio 4 Book of the Week Francis Pryor brings the magic of the Fens to life in a deeply personal and utterly enthralling way TONY ROBINSON Pryor feels the land rather than simply knowing it GUARDIAN Inland from the Wash on England's eastern coast crisscrossed by substantial rivers and punctuated by soaring church spires are the low lying marshy and mysterious Fens Formed by marine and freshwater flooding and historically wealthy owing to the fertility of their soils the Fens of Lincolnshire and Cambridgeshire are one of the most distinctive neglected and extraordinary regions of England Francis Pryor has the most intimate of connections with this landscape For some forty years he has dug its soils as a working archaeologist making ground breaking discoveries about the nature of prehistoric settlement in the area and raising sheep in the flower growing country between Spalding and Wisbech In The Fens he counterpoints the history of the Fenland landscape and its transformation from Bronze age field systems to Iron Age hillforts from the rise of prosperous towns such as King's Lynn Ely and Cambridge to the ambitious drainage projects that created the Old and New Bedford Rivers with the story of his own discovery of it as an archaeologist Affectionate richly informative and deftly executed The Fens weaves together strands of archaeology history and personal experience into a satisfying narrative portrait of a complex and threatened landscape

A History of the Fens of South Lincolnshire William Henry Wheeler, 2013-10-31 This expanded 1896 second edition gives a detailed history of the reclamation and drainage of the Fens of South Lincolnshire

The Lost Fens Ian D. Rotherham, 2013-04-01 The loss of the great fenlands of eastern England is the greatest single removal of ecology in our history So thorough was the process that most visitors to the regions or even people living there have little idea of what has gone For many the Fenlands are the vast expansive flatlands of intensive farming the breadbaskets of Britain Lost are the vast flocks of wetland birds that filled the evening skies in winter the frozen wetlands and the fen skaters of the winter and the abundant black terns or breeding wading birds of the summer months However pause a while off main roads and consider place names and road names Fenny Lane The Withies Commonside Reed Holme Fen Common Turbary Lane Wildmore Adventurers Fen Wicken Fen and more they tell a story of a landscape now gone but once hugely important The Fens bred revolution and civil war and paid the penalty They nurtured religious non conformism with global impact After 1066 the Saxons withheld the Normans onslaught and in the 1970s unting's Beavers took action against twentieth century invaders The fenscapes neither water nor land but something in between breed independence and if necessary dissent This story is of politically and economically driven ecological catastrophe and loss So much has gone but we do not even know fully what was there before With global environmental change and especially climate change fenlands once again have major roles in our sustainable futures

The Story of the Fens Frank Meeres, 2019-03-29 Lincolnshire Cambridgeshire Norfolk and Suffolk as well as Peterborough City Council all lay claim to a part of the Fens Since Roman times man has increased the land mass in this area by one third of the size It is the largest

plain in the British Isles covering an area of nearly three quarters of a million acres and is unique to the UK The fen people know the area as marsh land reclaimed from the sea and fen land drained from flooding rivers running from the uplands The Fens are unique in having more miles of navigable waterways than anywhere else in the UK Mammoth drainage schemes in the seventeenth and eighteenth changed the landscape forever leading slowly but surely to the area so loved today Insightful entertaining and full of rich incident here is the fascinating story of the Fens **Valued Environments** John R.

Gold,Jacquelin Burgess,2019-03-21 First published in 1982 People care about places Inhabitants demand more participation in the changes proposed for their local environments activists urge greater protection of countryside and natural environments decision makers feel threatened by the antagonism aroused by their powers and plans The essays in this book have been drawn together to discover what lies behind these expressions of concern and discontent Valued environments are places for which people feel commitment and affection places which support a sense of personal identity and well being The authors explore the character and constituents of valued environments asking how our experiences of environments may be enhanced What is the impact of environmental change How can the future be accommodated in both rural and urban environments without destroying their essential qualities The reader will find substantive evidence from case studies of environments valued by inhabitants and outsiders which answer these questions Examples are taken from wilderness areas fenland market towns and large cities commercial streets and residential neighbourhoods environments of the past and those imagined in science fiction The essays are united in their focus on the meaning of places and landscapes The subtle but highly significant role of valued environments is examined thoroughly in the book It will be of interest to all who care deeply about their surroundings reflecting perhaps some of their own experiences as well as conveying information about the environmental experiences of others Students of geography environmental planning and conservation should also find the book directly relevant to their interests in man environment relationships **Dick O' the Fens** George Manville

Fenn,2020-07-17 Reproduction of the original Dick o the Fens by George Manville Fenn **Race and Urban Space in Contemporary American Culture** Liam Kennedy,2000 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company **Battlescapes** Ian D Rotherham,2024-08-22 This comprehensive study explores the landscapes and heritage of past conflicts along with defensive and offensive structures Throughout history nature its resources landscape and terrain has shaped the tactics of warfare and determined its outcomes From the medieval English Fens to the 20th century Iraqi Marsh Arabs landscapes have fostered resistance and dissention Harnessed by people under threat the landscape has influenced strategies and tactics Water and wetland halted campaigns in the Florida Everglades and in the Franco Prussian War of the late 1800s In the Second World War the Dutch flooded the drained polders to halt the Nazi advance and in 1938 the Chinese nationalist forces breached the flood dykes of the Yellow River to halt the Japanese advance Mountain ranges and deserts have long provided landscapes for resistance fighters From the former Yugoslavia to

Afghanistan these gnarly battlescapes traverse time and space Libyan fighters held off invading Italian forces by operating from the caves and valleys of the Green Mountains and the Welsh defended their mountainous principalities against the Angevin Normans The landscapes and heritage of past conflicts defensive and offensive structures and much more are brought together in this comprehensive study Fenland Nature Duncan Poyser, Simon Stirrup, 2025-05-06 This book showcases the natural history and landscape of the Fens an area now responsible for a third of Britain's food production and worth over 3 billion to the economy every year It describes the geology and geography across the Fenland Basin over the last 14 000 years a period dominated by the flux of wetlands and movement of water The human relationship with this landscape is traced through history from Mesolithic hunters to the prosperity of a medieval economy based on the currency of eels through the taming and draining of the vast wetlands to modern farming on an industrial scale While recognising that only a fraction of the Fens is left Fenland Nature celebrates the breadth of wildlife still to be found in the region from vast flocks of visiting wildfowl in the winter months to rare and specialised plants and insects all illustrated with detailed and evocative photographs The book concludes by contemplating an uncertain future where there are possibilities for a sustainable agricultural industry alongside increasing biodiversity requiring new ways of thinking and working with the land The fenland landscape is a microcosm of the huge global challenges caused by habitat loss ecological degradation and climate change If solutions can be found to these complex issues in the Fens then there is hope that these can also apply to similar places across the world **Miscellaneous** United States. Department of Agriculture, 1884
