Spitz and Fisher's Medicolegal Investigation of Death Werner U. Spitz,Francisco J. Diaz,2020-07-20 This is not just a new edition but a different book emphasizing trauma and wound analysis The addition of a new co editor Dr Francisco J Diaz has brought new ideas to this fifth edition A chapter by Doctor Jan Leetsma world renowned neuropathologist has also been included Doctor Leetsma s vast experience in forensic neuropathology will certainly enhance this book Several chapters have been eliminated that are no longer applicable or which are adequately covered in other publications Over time in the past 48 years since this book was first published Medicolegal Investigation of Death has been dubbed the Bible of Forensic Pathology The fifth edition includes over 600 case reports and hundreds of color photographs The cases are from files the authors have personally handled According to author Spitz We have found many times analysis of small wounds will lead to understanding of a giant case like the case in Hawaii where a body was found under a full size van with a thread mark on the cheek

consistent with having been hit with a black pipe used for gas lines that were found in a bucket in the rear of the van As it turned out this was a murder not an accident The book is full of such cases This book will help you understand the details of injuries and how a person was injured and how they died and how these injuries perhaps at first blush possibly seemingly insignificant can shed new light on a case Medicolegal Investigation of Death now embraces not just basic forensic pathology but also includes death during restraint conscious pain and suffering and new concepts related to the interpretation of injuries by detailed wound analysis The continued use of simple non technical terminology makes this book a truly unique treatise and source of information

Dissecting Death Frederick Zugibe, M.D., David L. Carroll, 2006-07-18 From TV s CSI to bestsellers by Patricia Cornwell and Kathy Reichs interest in forensics is at an all time high Now one of our most respected forensic pathologists gives a behind the scenes look at eleven of his most notorious cases cracked by scientific analysis and Sherlock Holmesian deduction As chief medical examiner of Rockland County New York for almost thirty five years Dr Frederick Zugibe literally wrote the book on the subject his widely used textbook is considered the definitive text Over the years he has pioneered countless innovations including the invention of a formula to soften mummified fingers enabling fingerprinting and thus identification of a long deceased victim He has appeared as an

expert hundreds of times in the media and in the courtroom and not once has a jury failed to accept his testimony over opposing expert witnesses And now in *Dissecting Death* he has opened the door to the world of forensic pathology in all its gruesome and fascinating mystery Dr Zugibe takes us through the process all good pathologists follow using eleven of his most challenging cases With him we visit the often grisly though sometimes shockingly banal crime scene We inspect the body palpate the wounds search for clues in the hair and skin We employ ultraviolet light strange measuring devices optical instruments We see how a forensic pathologist determines the hour of death the type of weapon used the killer's escape route And then we enter the lab the world of high tech criminal detection DNA testing fingerprinting gunshot patterns dental patterns X rays But not every case ends in a conviction and in a closing chapter Dr Zugibe examines some recent high profile cases in which blunders led to killers going free either because the wrong party was brought to trial or because the evidence presented didn't do the trick including Jon Benet Ramsey's murder and of course the O J Simpson trial
