Small Claims Large Encounters:

Gay and Lesbian Literature Since World War II Sonya L Jones, 2014-05-22 *Gay and Lesbian Literature Since World War II* chronicles the multifaceted explosion of gay and lesbian writing that has taken place in the second half of the twentieth century. Encompassing a wide range of subject matter and a balance of gay and lesbian concerns, it includes work by established scholars as well as young theoreticians and archivists who have initiated new areas of investigation. The contributors' examinations of this rich literary period make it easy to view the half century from 1948 to 1998 as the Queer Renaissance. Included in *Gay and Lesbian Literature Since World War II* are critical and social analyses of literary movements, novels, short fiction, periodicals, and poetry, as well as a look at the challenges of establishing a repository for lesbian cultural history. Specific chapters in this groundbreaking work trace the development of gay poetry in America after World War II, examine how AIDS is represented in the first four Latino novels to deal with the subject matter, and chronicle the birth of lesbian feminist publishing in the 1970s, showing how it created a flourishing gay literature in the 1980s and 1990s. Other chapters outline the history of *The Ladder* from its initial publication in 1956 as the official vehicle of the Daughters of Bilitis to its final issue as a privately published literary magazine in 1972; examine Baldwin's 1962 novel *Another Country* and discuss the complicated critical history of this work and its relation to Baldwin's literary reputation; racial, sexual, and political factors are taken into account; chart how *Other Voices*, *Other Rooms* by Truman Capote, and *The House of Breath* by William Goyen reveal contradictory genderings of male homosexuality, suggesting an absence of a unified model of mid-twentieth-century male homosexuality; argue that the 1976 novel *Lover* by Bertha Harris can be considered an exemplary novel within discussions of both postmodern fiction and lesbian theory. The author calls for Harris to be added to the group of writers such as Wittig, Anzaldúa, Lorde, and Winterson, who are discussed within the context of a postmodern lesbian narrative; examine the short fiction of Canadian lesbian novelist Jane Rule in an effort to shed light on lesbian creative practice in the homophobic climate of postwar North America; argue for an understanding of Dale Peck's novel *Martin and John* as an attempt to link two apparently different processes of import to contemporary male subjects through examination of the novel alongside selected passages from Nietzsche and Freud; focus on the pragmatic issues of developing and maintaining accessible research venues from which to cultivate the study of racial and cultural diversity in lesbian lives. Document the history of the Lesbian Herstory Archives, one of the first lesbian-specific collections in the world, from its birth in the early 1970s to the present.

It's a Buddhist model for identifying your unique mix of personality traits that make up your innate intelligence. All five qualities—presence, clarity, richness, passion, and action—are your rich resource. By cultivating them, you begin to see how you can use this remarkable system to enhance your relationships, your work, and your creativity.

Ultimately this system introduces us to a larger world the totality and interconnectedness of everyone and everything

and David Grossman's *See Under Love* *Galaxy Interactions at Low and High Redshift* J.E. Barnes, D.B. Sanders, 2012-12-06 The 186th IAU Symposium came at an exciting and perhaps even historic time for extragalactic astronomy. New spacecraft observations plumbed the depths of the Universe out to redshifts of five while revealing astounding details of nearby galaxies and AGN at intermediate redshifts. Theoretical ideas on structure formation together with results from detailed numerical modeling created a comprehensive framework for modeling the formation of galaxies and the transformation of galaxies by interactions and mergers. All these strands came together at the Symposium as participants glimpsed a developing synthesis highlighting galactic encounters and their role in the history of the Universe. This volume offers professional astronomers including PhD students an overview of the rapidly advancing subject of galaxy interactions at low and high redshifts *Directory of American Poetry Books*, 1997 **Human Emotions** Jonathan H. Turner, 2007 This major theoretical work takes existing work on the emotions in significantly new directions. It gives a comprehensive account of emotions beginning with general sociological principles moving over important theory construction of social formation and applying this to a detailed and unified grand theory of human emotions. Presenting a unified view of the emotions in the social universe, the book explores the relationships between emotions, social structure, and culture. Turner hypothesizes how social structure and culture affect emotional arousal in humans and vice versa. This book is essential reading for undergraduate and postgraduate students researching sociology of emotions, social psychology, and contemporary social theory, and is also relevant for students and researchers working in the fields of psychology and cultural studies **Consumer Controversies Resolution Act** United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 1977 *The Routledge Handbook of Language in Conflict* Matthew Evans, Lesley Jeffries, Jim O'Driscoll, 2019-05-10 The Routledge Handbook of Language in Conflict presents a range of linguistic approaches as a means for examining the nature of communication related to conflict. Divided into four sections, the Handbook critically examines text interaction, languages, and applications of linguistics in situations of conflict. Spanning 30 chapters by a variety of international scholars, this Handbook includes real-life case studies of conflict and covers conflicts from a wide range of geographical locations at every scale of involvement from the personal to the international of every timespan from the fleeting to the decades long and of varying levels of intensity from the barely articulated to the overtly hostile. It sets out the textual and interactional ways in which conflict is engendered and in which people and groups of people can be set against each other, considers what linguistic research has brought and can bring to the universal aim of minimising the negative effects of outbreaks of conflict wherever and whenever they occur. The Routledge Handbook of Language in Conflict is an essential reference book for students and researchers of language and communication, linguistics, peace studies, international relations, and conflict studies **The Iran-United States Claims Tribunal and the Process of International Claims Resolution** David D. underlying patterns that characterize such international institutions this valuable book records the diverse experiences and judgments of a group of outstanding lawyers each of whom has played a significant role at some stage of the Tribunal's proceedings The essays are grouped in three distinct stages in the Tribunal's history The first group deals with the creation of the Tribunal building upon the bare boned framework laid down by the Claims Settlement Declaration The second deals with the Tribunal at work processing and deciding cases during the period when it gave greatest emphasis to resolving large commercial claims The third deals with the present situation where the Tribunal has taken a docket first dominated by claims of U S Iranian dual nationals against Iran and then by a small group of large and difficult claims between the two governments Published under the auspices of the American Society of International Law Published under the Transnational Publishers imprint Journal of the National Cancer Institute ,1990 Heroism and the Changing Character of War S. Scheipers,2014-04-01 Post heroism is often perceived as one of the main aspects of change in the character of war a phenomenon prevalent in western societies According to this view demographic and cultural changes in the west have severely decreased the tolerance for casualties in war This edited volume provides a critical examination of this idea
