Sisters Thoughts On That Special Relationship:

Sisters ,1993 Technologies of Procreation Jeanette Edwards,1993 An anthropology research team drawn from four British universities explores how assisted conception techniques create the potential for a redefinition of relationships because it is now possible to create life on behalf of another person They draw data and ideas from ethnographic studies household interviews and debates in Parliament and among clinicians Distributed by St Martin s Press Annotation copyright by Book News Inc Portland OR **Human Thought and Social Organization** Murray J. Leaf,Dwight Read,2012-06-07 Human beings have two outstanding characteristics compared to all other species the apparently enormous elaboration of our thought through language and symbolism and the elaboration of our forms of social organization The view taken in Human Thought and Social Organization Anthropology on a New Plane is that these are intimately interconnected To understand this connection the book compares the structure of the systems of thought that organizations are built upon with the organizational basis of human thinking as such An experimental method is used leading to a new science of the structure of human social organizations in two senses First it gives rise to a new kind of ethnology that has the combination of empirical solidity and formal analytical rigor associated with the paradigmatic sciences Second it makes evident that social organizations have distinctive properties and require distinctive explanations of a sort that cannot be reduced to the explanations drawn from or grounded in these other sciences Human social organizations are created by people using systems of ideas with very specific logical properties This book describes what these idea systems are with an unbroken chain of analysis that begins with field elicitation and continues by working out their most fundamental logico mathematical generative elements This enables us to see precisely how these idea systems are used to generate organizations that give pattern to ongoing behavior The book shows how organizations are objectified by community members through symbolic representations that provide them with shared conceptions of organizations roles or relations that they see each other as participating in The case for this constructive process being pan Homo sapiens is described spanning all human communities from the Upper Paleolithic to today and from the most seemingly primitive Australian tribes to modern day America and India While focusing primarily on kinship Human Thought and Social Organization shows how the analysis applies with equal precision to other social areas ranging from farming to political factionalism **The Path of Rebirth against the Will of Heaven** Karen Lee,2012-03-12 Jiangkou Town in Fulin southwestern China is close to the sea so most of the people here make a living from the sea and choose the profession of fisherman In the spring of 1984 the hostess of a very ordinary fisherman s family in Jiangkou Town gave birth to a baby boy after a silent delivery Sister Republics David G. Haglund,2023-03-01 David G Haglund s Sister Republics tells the story of the unique relationship between the United States and its first ally France Historians and political scientists have characterized interactions between the two countries in the spheres of security and defense policy in radically different ways either the two comport themselves in a highly cooperative

fashion befitting their status as old allies and steadfast friends or they act as bitter rivals revealing their alliance to be at best dysfunctional and at worst destructive Haglund uses a fresh approach to reconcile these divergent positions examining the Franco American bond through the prism of strategic culture In doing so he reveals the cultural factors that have contributed to the suboptimal relationship between the two nations The Function and Forms of Thought Albert Edwin Avey,1927
