Paper ,1961 Mallory, Irvine and Everest Robert H Edwards,2024-06-01 Unique and unconventional Robert H Edwards
book provides a new perspective on mountaineering s greatest riddle With fresh information some controversial opinions and
plenty food for thought it is bound to pour more fuel into the eternal flame that is the mystery of Mallory and Irvine For this
alone I highly recommend reading it Jochen Hemmleb Mountaineering writer and filmmaker coinstigator and member of the
1999 expedition that found Mallory s body and three more search expeditions to Mount Everest For a quarter of a century I
ve been held captive by the ghosts of Mallory Irvine and their mysterious disappearance on Mount Everest in 1924 Finally
Bob Edwards has meticulously assembled all of the facts the clues and the countless possibilities surrounding their fate in a
single fascinating book Thom Dharma Pollard Member of the 1999 expedition that found Mallory s body The last climb of
George Mallory and Andrew Irvine towards the summit of Mount Everest on 8 June 1924 has been shrouded in mystery for a
century Were they the first humans to stand at the highest point in the world The discovery of Mallory s body in 1999 did
nothing to resolve the mystery Until now accounts of their climb have been driven by speculation and preconceived narrative
In this book which marks the 100th anniversary of the fateful climb Dr Robert Edwards brings the fresh and original
perspective of a mathematician to the story of Mallory and Irvine Dr Edwards has assembled the contemporary accounts of
the early British expeditions written by the climbers and their leaders and has identified their anomalies and inconsistencies
He has studied the letters of George Mallory and has held in his hand the diaries of Andrew Irvine He has viewed in person
some of the surviving artifacts the ice axe found in 1933 and Mallory s boots recovered in 1999 He has corresponded with
modern mountaineers who have climbed Everest Above all he has applied mathematics and modern imaging and mapping
technology to an analysis of what the 1924 climbers could and could not have seen and done Shorter Contributions to
