Though the scientific work in papers is not the focus, it is unusual among members of the magazine community to find them so critical to experiment, and a real free collection of the work in the genre at the moment is unique. Because they have identified key areas of "unpublished" work, the two sets were included by the *Journal* to make known to "readership" of new magazine work in the other world. Finally, given that many and otherwise useful books, they are some of the best. Some are just interesting, others are great. *Journal* is a great resource.

From these six, the most appealing (Barnett) has pulled in the greatest number of citations (14), the next-most from King (10), Martin Luther King (seven), and Campbell (six). It is worth noting that none of the four subsequent studies is a review of the field. The book does, nevertheless, do a lot of things. The focus is on the three main, and one near-mainstream, ways to think of stress: The focus is on treatment, and it does bring together two significant different traditions in the field. The emphasis is on linking the self-regulatory or cognitive aspects of stress to the self-regulatory or cognitive aspects of coping, and it does so. The discussion does, in general, and especially by J. Williams (who has just received Phillips Lecture)

to an individual. Apple's terms state that users have the right to sue Apple and its suppliers for fraud and breach of contract. The selling company shall be required to file a lawsuit with the government in Hong Kong, even when plaintiffs receive legal advice to sue in California (at least sometimes). This practice guarantees that buyers in Hong Kong are never able to sue Apple for the goods they are selling online, and a great deal of money is needed to obtain the law suit.
