How can education better support the mental health wellbeing of young people Research in the 1970s that addressed this question has since proven seminal to the development of two co existing fields of research that continue to offer mutually informative insights Developmental Psychopathology DP and Educational Effectiveness Research EER DP and EER share the common agenda of understanding factors that relate to individuals learning and development DP focuses on the individual learning and developing in context EER investigates the educational systems structures and processes that shape how individuals learn and develop Given the complementarity of DP and EER it is somewhat surprising that they have rarely joined forces and synthesised knowledge to develop a fuller understanding of the roles educational contexts play in the mental health and wellbeing of students This Research Topic aims to stimulate such collaboration **From West to East:**

Children and Adolescents Kai Yuan, Yanping Bao, Yue Leng, Xiaoyu Li, 2023-11-13 The coronavirus disease 2019 COVID 19 epidemic has dramatically spread throughout the world which has also caused mental health problems among the public especially vulnerable groups like children and adolescents As a traumatic event the outbreak of COVID 19 might increase the prevalence of a series of mental health problems in children and adolescents probably due to social distancing school closures as well as separation from parents and home quarantine The continuing spreading of COVID 19 infection as well as vaccine uptake strategies quarantine policies and health services during post epidemic era may also have a long lasting side effect on children and adolescents Children and adolescents are in critical periods of neurodevelopment and once they

develop mental health problems the long lasting negative influence might span across their lifetime Moreover long term multisystem sequelae including neurological and psychiatric systems of COVID 19 infection in children also compromise the development of physical and mental wellbeing in adulthood Though there have been several studies on mental health consequences and long term impact on the mental health of children and adolescents caused by COVID 19 there is still limited data and more comprehensive studies are needed on this important topic Attachment in Adulthood Mario Mikulincer, Phillip R.
