

Development of Java Smart Card Application (applet)

There are 4 steps comprise the Java Card applet development:

1. Specify the functions of the applet
 - E.g., security function requires the user to enter a PIN, card locks after three unsuccessful attempts to enter the PIN.
 2. Request and assign AIDs to both the applet and the package containing the applet class
 3. Design the class structure of the applet programs
 4. Define the interface between the applet and the terminal application
- Develop using the JavaCard development kit

Smart Card Application Development Using Java Uwe Hansmann, Martin S. Nicklous, Thomas Schäck, Achim Schneider, Frank Seliger, 2012-12-06 In today's world smart cards play an increasingly important role in everyday life. We encounter them as credit cards, loyalty cards, electronic purses, health cards, and as secure tokens for authentication or digital signature. Their small size and the compatibility of their form with the magnetic stripe card make them ideal carriers of personal information such as secret keys, passwords, customization profiles, and medical emergency information. This book provides a guide for the rapid development of smart card applications using Java and the OpenCard Framework. It gives you the basic information you need about smart cards and how they work. It shows in detail how to develop applications that use smart cards by guiding you through examples step by step. A smart card provided with the book will help you to quickly get some first hands on experience. *Smart Card Application Development Using Java* Uwe Hansmann, Martin S.

Das Buch bietet erstmals einen Leitfaden zur Entwicklung von Smartcard Anwendungen mit Java JDK ab Version 1.1.6 und OCF 1.1.1 auf dem Computer sowie zur Entwicklung von Java Applets, die direkt auf einer Karte (Java Card) ausgeführt werden. Der erste Teil führt konzipiert in Grundlagen, Technologie und Anwendungsmöglichkeiten von Smartcard ein. Im zweiten Teil werden Ziel, Konzept, Architektur und Komponenten des OpenCard Framework detailliert beschrieben. Der dritte Teil demonstriert anhand einfacher Beispiele Aufbau und Design komplexer Anwendungen für den Karten- und den Host-Teil. Mit der beiliegenden Multi-Function Card lassen sich die beschriebenen Beispiele leicht ausführen und weiterentwickeln. *Smart Cards, Tokens, Security and Applications* Keith Mayes, Konstantinos Markantonakis, 2017-05-18 This book provides a broad overview of the many card systems and solutions that are in practical use today. Research and Applications Jean-Jacques

Quisquater, Bruce Schneier, 2006-12-30 Smart cards have been driven by the need for a secure portable computing platform. Hence it is no surprise that security considerations dominated their research. The CARDIS conferences were created to provide a forum for this research. CARDIS 1998 is the third international conference on Smart Card Research and Advanced Applications held in Louvain la Neuve Belgium 14-16 Sept 1998. The first CARDIS was held in Lille France in November 1994 and the second was held in Amsterdam The Netherlands in September 1996. The fourth CARDIS is scheduled to take place in Bristol UK in September 2000. <http://www.cardis.org>. This volume contains the refereed papers presented at CARDIS 1998. These 35 papers were first published in a pre-proceedings and distributed to the attendees at the conference; they have subsequently been revised and updated for this volume. The papers discuss all aspects of smart card research: Java cards, electronic commerce applications, efficiency, security including cryptographic algorithms, cryptographic protocols and authentication and architecture. Submissions from Europe, the U.S., Asia and Australia show that this is indeed an international area of research and one that is becoming more popular as practical demand for smart cards increases. We wish to thank the Program Committee members who did an excellent job in reviewing papers and providing feedback to the authors.

The Conference arranged jointly by Technical Committees 11 and 6 of the International Federation of Information Processing IFIP was organized by the Department of Electrical Engineering of the Katholieke Universiteit Leuven. The name Communications and Multimedia Security was used for the first time in 1995 when Reinhard Posch organized the first in this series of conferences in Graz Austria following up on the previously national Austrian IT Sicherheit conferences held in Klagenfurt 1993 and Vienna 1994. In 1996 CMS took place in Essen Germany. In 1997 the conference moved to Athens Greece. The Conference aims to provide an international forum for presentations and discussions on protocols and techniques for providing secure information networks. The contributions in this volume review the state of the art in communications and multimedia security and discuss practical aspects of topics, experiences and new developments. They cover a wide spectrum including network security, web security, protocols for entity authentication and key agreement protocols for mobile environments, applied cryptology, watermarking, smart cards and legal aspects of digital signatures.
