Josie's Story
Sorrel King, 2010-09-14 The wrenching but inspiring true story of a tragic medical mistake that turned a grieving mother into a national advocate The Wall Street Journal Sorrel King was a young mother of four when her eighteen month old daughter was badly burned by a faulty water heater in the family's new home Taken to the world renowned Johns Hopkins Hospital Josie made a remarkable recovery But as she was preparing to leave the hospital's system of communication broke down and Josie was given a fatal shot of methadone sending her into cardiac arrest Within forty eight hours the King family went from planning a homecoming to planning a funeral Dizzy with grief falling into deep depression and close to ending her marriage Sorrel slowly pulled herself and her life back together Accepting Hopkins settlement she and her husband established the Josie King Foundation They began to implement basic programs in hospitals emphasizing communication between patients family and medical staff programs like Family Activated Rapid Response Teams which are now in place in hospitals around the country Today Sorrel and the work of the foundation have had a tremendous impact on health care providers making medical care safer for all of us and earning Sorrel a well deserved reputation as one of the leading voices in patient safety I cried I cheered at this account of one woman's unlikely path from full time mom to nationally renowned patient advocate Ann Hood Part indictment part celebration part catharsis Josie's Story is the startling moving and inspirational chronicle of how a mother and her unforgettable daughter are transforming the face of American medicine Richmond Times Dispatch

Safety and Ethics in Healthcare: A Guide to Getting it Right Bill Runciman, Alan Merry, Merrilyn Walton, 2017-05-15 As more and more people survive into old age the burden of caring for them becomes greater and greater Although it is now possible to alleviate many of the afflictions that beset mankind no society can afford to pay for all the healthcare that is now available or technically possible People working in healthcare increasingly have to do more with less Rationing takes many forms mostly covert and the less privileged in most societies end up struggling to get their proper share of the available healthcare resources All too often those in the front line have to deal with the consequences of this rationing by default healthcare professionals find themselves rushed off their feet simply doing the basic tasks and completing all the paperwork placing frail

sick people in ever lengthening queues sometimes asking them to wait for hours in the middle of the night under uncomfortable and even unsafe conditions and worst of all working under conditions they would rather avoid in which the safety margin for those they are caring for has been greatly diminished We are all aware that under these conditions the chance of making a mistake which can seriously harm or even lead to the death of a patient is greatly increased But what can be done about this How can you be sure that you are doing the right thing when faced with having to practise an uncertain science on vulnerable patients in a complex system under ever changing conditions At what point could you cross the invisible line from reasonable to irresponsible or unethical behaviour by tolerating conditions or tacitly accepting practices which may be regarded as unacceptable even though you may have little immediate control over them This book is a guide to getting it right for healthcare professionals It is about doing the right thing in the right way at the right time for the right people These are the dimensions of quality in healthcare and although some are in conflict equitable access and efficiency for example adherence to ethical practice and professional behaviour will help lead healthcare practitioners through the minefield of responsibilities and priorities Real life situations are integral to the book with over 500 clinical examples referred to within the text
