McNamee Artificial intelligence is going to change the world as we know it But the real danger isn't some robot that's going  
to enslave us It's our own brain Our brains are constantly making decisions using shortcuts biases and hidden processes and  
we're using those same techniques to create technology that makes choices for us In The Loop award winning science  
journalist Jacob Ward reveals how we are poised to build all of our worst instincts into our AIs creating a narrow loop where  
each generation has fewer predetermined and even dangerous choices Taking us on a world tour of the ongoing real world  
experiment of artificial intelligence The Loop illuminates the dangers of writing dangerous human habits into our machines  
From a biometric surveillance state in India that tracks the movements of over a billion people to a social media control  
system in China that punishes deviant friendships to the risky multiple choice simplicity of automated military action Ward  
travels the world speaking with top experts confronting the perils of their research Each stop reveals how the most obvious  
patterns in our behavior patterns an algorithm will use to make decisions about what's best for us are not the ones we want

to perpetuate Just as politics marketing and finance have all exploited the weaknesses of our human programming artificial intelligence is poised to use the patterns of our lives to manipulate us The Loop is call to look at ourselves more clearly our most creative ideas our most destructive impulses the ways we help and hurt one another so we can put only the best parts of ourselves into the thinking machines we create *St. Elmo* Augusta Jane Evans,1896 **Elmo's Model Speaker for Platform, School and Home** Thomas W.
