Slipform Concrete R. G. Batterham,1980 Advanced Concrete Technology 3 John Newman,B S Choo,2003-10-30
Based on the Institute of Concrete Technology s Advanced Concrete Technology Course these four volumes are a comprehensive educational and reference resource for the concrete materials technologist An expert international team of authors from research academia and industry has been brought together to produce this unique series Each volume deals with a different aspect of the subject constituent materials properties processes and testing and quality With worked examples case studies and illustrations throughout the books will be a key reference for the concrete specialist for years to come Expert international authorship ensures the series is authoritative Case studies and worked examples help the reader apply their knowledge to practice Comprehensive coverage of the subject gives the reader all the necessary reference material Field Study of Air Content Stability in the Slipform Paving Process ,2012 This study evaluated the impacts of construction on the air content and air void system structure of Portland cement concrete pavements The primary intent was to quantify the air content of fresh concrete before and after it has gone through the slipform paver The air void system parameters of hardened concrete were then assessed using cast and extracted core specimens The results of the air content testing on fresh concrete and the concrete cylinder specimens cast in the field suggested that there is some loss of air as the concrete passes through the paver Laboratory testing performed on cores extracted from the pavement did not provide any conclusive evidence that entrained air is lost during the slipform paving process In fact many of the extracted cores had measured air content values that were much higher than the specification requirement If excessive this could result in increased permeability and low strength related issues Although a rigorous statistical analysis was not performed the results suggest that the air content testing on fresh concrete is not capturing the true air content of the concrete placed with a slipform paver The fresh concrete air content is generally lower than the air content measured in the cores Standard Practice for Concrete Pavements ,1987 **Testing During Concrete Construction** H.W. Reinhardt,1991-01-31 Testing concrete while construction is underway enables decisions to be made which can improve the quality of the finished structure The book covers testing and measuring techniques for fresh concrete and concrete during the first few days after placing and for reinforcement and prestressing tendons Many examples are given of practical methods which can be applied directly during concrete construction to improve quality It forms the Proceedings of the International RILEM Workshop in Mainz Germany March 1990 **Concrete Materials and Construction** Mr. Rohit Manglik,2024-06-24 In this book we will study about concrete materials and construction to understand its practical applications and theoretical foundations across scientific and engineering disciplines Advanced Concrete Technology Set John Newman,B S Choo,2003-11-06 Based on the Institute of Concrete Technology s advanced course this new four volume series is a comprehensive educational and reference resource for the concrete materials technologist An expert international team of authors from research academia
