Rotherham, 2013-04-01 The loss of the great fenlands of eastern England is the greatest single removal of ecology in our history So thorough was the process that most visitors to the regions or even people living there have little idea of what has gone For many the Fenlands are the vast expansive flatlands of intensive farming the breadbaskets of Britain Lost are the vast flocks of wetland birds that filled the evening skies in winter the frozen wetlands and the fen skaters of the winter and the abundant black terns or breeding wading birds of the summer months However pause a while off main roads and consider place names and road names Fenny Lane The Withies Commonside Reed Holme Fen Common Turbary Lane Wildmore Adventurers Fen Wicken Fen and more they tell a story of a landscape now gone but once hugely important The Fens bred revolution and civil war and paid the penalty They nurtured religious non conformism with global impact After 1066 the Saxons withheld the Normans onslaught and in the 1970s unting's Beavers took action against twentieth century invaders The fenscapes neither water nor land but something in between breed independence and if necessary dissent This story is of politically and economically driven ecological catastrophe and loss So much has gone but we do not even know fully what was there before With global environmental change and especially climate change fenlands once again have major roles in our sustainable futures A Classification of Palaearctic Habitats Pierre Devilliers, Jean Devilliers-Terschuren, Council of Europe, 1996-01-01 Wildlife Review, 1990 **Innovations in Planning Facilities for Sci-Tech Libraries** Ellis Mount, 2019-12-06 This book first published in 1986 is a practical resource to planning science and technology libraries Librarians who have been through the process offer guidelines an awareness of problems to anticipate and solutions to them Shaping Ecology Peter G.

Ayres,2012-03-14 Sir Arthur Tansley was the leading figure in ecology for the first half of the 20th century founding the field and forming its first professional societies He was the first President of the British Ecological Society and the first chair of the Field Studies Council His work as a botanist is considered seminal and he is recognized as one of the giants of ecology throughout the world Ecology underpins the principles and practices of modern conservation and the maintenance of biodiversity It explains the causes of and offers solutions to problems of climate change Yet ecology is a young science barely 100 years old Its origins lie in phytogeography the naming and mapping of plants Shaping Ecology is a book about a multi faceted man whose friends included Bertrand Russell Marie Stopes Julian Huxley GM Trevelyan and Solly Zuckerman Historical context is provided by Tansley s family for his parents moved in the Fabian socialist world of John Ruskin and Octavia Hill both instrumental in the foundation of the National Trust While Britain was relatively slow to protect its green spaces and wildlife it did establish in 1913 the first professional Ecological Society in the world Tansley was its President Organising the British Vegetation Committee and initiating a series of International Phytogeographic Excursions he changed phytogeography into ecology
