The Mad Scientist Paperback:

The Mad Scientist Kiki Thorpe, 2009 Polly's odd mad scientist stepbrother Damon has always been home schooled until now. This year he's in Polly's class where he doesn't look or act like any of the other kids. He's also decided to compete in the science fair, spending hours in his creepy basement laboratory. Polly doesn't know which is worse: that Damon's creating something truly sinister for the science fair or that he might actually win.

Mad Scientist #4 Kiki Thorpe, 2009 Polly's mad scientist stepbrother Damon spends hours in his creepy basement laboratory preparing to enter the school science fair. Polly doesn't know what is worse: that Damon is clearly up to no good with his experiment or that he might actually win first place at the fair.

The Mad Scientist Next Door Clare De Marco, 2018-01-18 Read Along or Enhanced eBook Ella's next door neighbor Mr. Willis is mean. She stays out of his way as much as possible. But when she accidentally sends her baby brother's favorite teddy bear into Mr. Willis' garden, Ella is forced to go over to his house. And Ella is in for a SHOCK.

The Mad Science Book Reto U. Schneider, 2008 You don't have to be an eccentric obsessive to be a scientist, but it helps. In *The Mad Science Book*, Reto Schneider tells the extraordinary tales of 100 of the more unusual experiments conducted across seven centuries of science. From the attempts of the 14th-century Dominican monk Theodoric von Freiberg to discover the cause of the rainbow to the efforts of the 20th-century psychologist Harry Harlow to be the perfect mother to a family of reluctant rhesus monkeys, these are stories that are often bizarre, sometimes mind-boggling, occasionally stomach-churning, but always diverting, informative, and enlightening. Among the myriad delights on display in this cabinet of scientific curiosities are the renowned doctor from Padua who sat in a pair of scales for 30 years recording the minutest changes in his weight, the sheep, the duck, and the rooster who became the world's first air passengers, the disgusting Dr. Stubbins-Ffirth who swallowed other people's vomit in an attempt to prove that yellow fever cannot be transmitted from one person to another, the hapless soldier Alexis St. Martin left with a hole in his stomach after an accident with a musket, and the ever-optimistic Charles-Edouard Brown-Séquard who injected himself with essence of guinea pig's testicles as an anti-ageing remedy. There is trivia here in abundance, but also quirky but genuinely influential science, notably Merrill Flood's and Melvin Dresher's experiments with choices of outcomes which have been widely influential as game theory. A fizzing cocktail of fascinating science and rich entertainment, *The Mad Science Book* tells the extraordinary stories of some truly madly geeky people. It should be top of every self-respecting science buff's Christmas 2008 wishlist.
