The Making Of Linguistics:

The Making and Breaking of Classification Models in Linguistics Jane Klavan, 2024-06-04 The book provides a methodological blueprint for the study of constructional alternations using corpus linguistic methods in combination with different types of experimental data The book looks at a case study from Estonian This morphologically rich language is typologically different from Indo European languages such as English Corpus based studies allow us to detect patterns in the data and determine what is typical in the language Experiments are needed to determine the upper and lower limits of human classification behaviour They give us an idea of what is possible in a language and show how human classification behaviour is susceptible to more variation than corpus based models lead us to believe Corpora and forced choice data tell us that when we produce language we prefer one construction Acceptability judgement data tell us that when we comprehend language we judge both constructions as acceptable The book makes a theoretical contribution to the what why and how of constructional alternations

Syntax in the Making Marja-Liisa Helasvuo, 2001 Research on the interplay between language structure and language use has shown that grammar is shaped maintained and modified by language use In this view then grammar is not seen as existing apart from language use but rather as a set of recurrent grammaticized patterns of discourse This book focuses on syntactic structuring in Finnish from the viewpoint of language use The author sets out to study syntactic structures in their local contexts in order to discover the more global patterns and constraints on the use of these structures The coding strategies point to the clause core as the locus of syntactic structuring this is where syntactic relations emerge most clearly It is shown that the key to understanding the coding of the core syntactic relations is the category of person The clause core also shows strong intonational unity as it is most often presented in one intonation unit Furthermore analysis of spoken discourse shows the robustness of the category of noun phrase both as a clausal constituent and as a free syntactic unit the free NP

Integrational Linguistics and Philosophy of Language in the Global South Sinfree B. Makoni, Deryn P. Verity, Anna Kaiper-Marquez, 2021-05-26 Exploring the nature of possible relationships between Integrational Linguistics and Southern Epistemologies this volume examines various ways in which Integrational Linguistics can be used to support the decolonizing interests of Southern Epistemologies particularly the lay oriented nature of Integrational Linguistics that Southern Epistemologies find productive as a positive counter discourse As both an anti elitist and anti establishment way of thinking these chapters consider how Integrational Linguistics can be consistent with the decolonial aspirations of Southern Epistemologies They argue that the relationship between Southern Epistemologies and Integrational Linguistics is complicated by the fact that while Integrational Linguistics is critical of what it calls a segregationist view of language i.e. the language myth Southern Epistemologies in language policy and planning and minority language movements find the language myth helpful in order to facilitate social transformation And yet both Integrational Linguistics and Southern Epistemologies are critical of approaches to multilingualism that are founded on notions of named languages They are also both critical of linguistics as a decontextualized and institutionalized extension of ordinary metalinguistic practices which at times influence the prejudices preconceptions and ideologies of dominant western cultures This book will prove to be an essential resource for scholars and students not only within the field of integrational
