Richardson, 2018-06-30 Debates over the remote and beguiling Southern Kuril Islands have revealed a kaleidoscope of divergent and contradictory ideas convictions and beliefs on what constitutes the national identity of post Soviet Russia Forming part of an archipelago stretching from Kamchatka to Hokkaido administered by Russia but claimed by Japan these disputed islands offer new perspectives on the ways in which territorial visions of the nation are refracted inverted and remade in a myriad of different ways At the Edge of the Nation provides a unique account of how the Southern Kurils have shaped the parameters of the Russian state and framed debates on the politics of identity in the post Soviet era By shifting the debate beyond a proliferation of Eurocentric and Moscow focused writings Paul B Richardson reveals broad alternatives and possibilities for Russian identity in Asia After the dissolution of the Soviet Union in 1991 when Russia was suffering the fragmentation of empire and a sudden decline in

its international standing these disputed islands became symbolic of a much larger debate on self image nationalism national space and Russia's place in world politics When viewed through the prism of the Southern Kurils ideas associated with the border state and nation become destabilized uncovering new insights into state society relations in modern Russia At the Edge of the Nation explores how disparate groups of political elites have attempted to use these islands to negotiate enduring tensions within Russia's identity and traces how the destiny of these isolated yet evocative islands became irrecoverably bound to the destiny of Russia itself

Nationalizing the Past S. Berger, C. Lorenz, 2016-01-19 Historians traditionally claim to be myth breakers but national history since the nineteenth century shows quite a record in myth making This exciting new volume compares how national historians in Europe have handled the opposing pulls of fact and fiction and shows which narrative strategies have contributed to the success of national histories

Ukraine and Russia Serhii Plokhy, Mykhailo Hrushevsky Professor of Ukrainian History Serhii Plokhy, 2008-01-01 The question of where Russian history ends and Ukrainian history begins has not yet received a satisfactory answer Generations of historians referred to Kyiv the capital of Ukraine as the starting point of the Muscovite dynasty the Russian state and ultimately the Russian nation However the history of Kyiv and that of the Scythians of the Northern Black Sea region have also been claimed by Ukrainian historians and are now regarded as integral parts of the history of Ukraine If these are actually the beginnings of Ukrainian history when does Russian history start In Ukraine and Russia Serhii Plokhy discusses many questions fundamental to the formation of modern Russian and Ukrainian historical identity He investigates the critical role of history in the development of modern national identities and offers historical and cultural insight into the current state of relations between the two nations Plokhy shows how history has been constructed used and misused in order to justify the existence of imperial and modern national projects and how those projects have influenced the interpretation of history in Russia and Ukraine This book makes important assertions not only about the conflicts and negotiations inherent to opposing historiographic traditions but about ways of overcoming the limitations imposed by those traditions

What Is a Nation? Timothy Baycroft, Mark Hewitson, 2006-06-29 This volume analyses and compares different forms of nationalism across a range of European countries and regions during the long nineteenth century It aims to put detailed studies of nationalist politics and thought which have proliferated over the last ten years or so into a wider European context By means of such contextualization together with new and systematic comparisons What is a Nation Europe 1789 1914 reassesses the arguments put forward in the principal works on nationalism as a whole many of which pre date the proliferation of case studies in the 1990s and which as a consequence make only inadequate reference to the national histories of European states The study reconsiders whether the distinction between civic and ethnic identities and politics in Europe has been overstated and whether it needs to be replaced altogether by a new set of concepts or types What is a Nation explores the relationship between this and other typologies relating them to complex processes of industrialization increasing state intervention secularization

democratization and urbanization Debates about citizenship political economy liberal institutions socialism empire changes in the states system Darwinism high and popular culture Romanticism and Christianity all affected and were affected by discussion of nationhood and nationalist politics The volume investigates the significance of such controversies and institutional changes for the history of modern nationalism as it was defined in diverse European countries and regions during the long nineteenth century By placing particular nineteenth century nationalist movements and nation building in a broader comparative context prominent historians of particular European states give an original and authoritative reassessment designed to appeal to students and academic readers alike of one of the most contentious topics of the modern period

Russia, Ukraine, and the Breakup of the Soviet Union Roman Szporluk, 2020-02-24 This book chronicles the final two decades in the history of the Soviet Union and presents a story that is often lost in the standard interpretations of the collapse of communism in Eastern Europe and the USSR Although there were numerous reasons for the collapse of communism it did not happen as it may have seemed to some overnight Indeed says Roman Szporluk the root causes go back even earlier than 1917 To understand why the USSR broke up the way it did it is necessary to understand the relationship between the two most important nations of the USSR Russia and Ukraine during the Soviet period and before as well as the parallel but interrelated processes of nation formation in both states Szporluk details a number of often overlooked factors leading to the USSR's fall how the processes of Russian identity formation were not completed by the time of the communist takeover in 1917 the unification of Ukraine in 1939 1945 and the Soviet period failing to find a resolution of the question of Russian Ukrainian relations The present day conflict in the Caucasus he asserts is a sign that the problems of Russian identity remain

Russian Nationalism and the National Reassertion of Russia Marlene Laruelle, 2009-05-07 Military action in South Ossetia growing tensions with the United States and NATO and Russia's relationship with the European Union demonstrate how the issue of Russian nationalism is increasingly at the heart of the international political agenda This book considers a wide range of aspects of Russian nationalism focussing on the Putin period It discusses the development of Russian nationalism including in the Soviet era and examines how Russian nationalism grows out of or is related to ideology culture racism religion and intellectual thinking and demonstrates how Russian nationalism affects many aspects of Russian society politics and foreign policy This book examines the different socio political phenomena which are variously defined as nationalism patriotism and xenophobia As Russia reasserts itself in the world with Russian nationalism as one of the key driving forces in this process an understanding of Russian nationalism is essential for understanding the dynamics of contemporary international relations

Russian Foreign Policy in the Twenty-first Century and the Shadow of the Past Robert Legvold, 2007 Because the turbulent trajectory of Russia's foreign policy since the collapse of the Soviet Union echoes previous moments of social and political transformation history offers a special vantage point from which to judge the current course of events In this book a mix of leading historians and political scientists examines the foreign policy of

contemporary Russia over four centuries of history The authors explain the impact of empire and its loss the interweaving of domestic and foreign impulses long standing approaches to national security and the effect of globalization over time Contributors focus on the underlying patterns that have marked Russian foreign policy and that persist today These patterns are driven by the country's political makeup geographical circumstances economic strivings unsettled position in the larger international setting and above all its tortured effort to resolve issues of national identity The argument here is not that the Russia of Putin and his successors must remain trapped by these historical patterns but that history allows for an assessment of how much or how little has changed in Russia's approach to the outside world and creates a foundation for identifying what must change if Russia is to evolve A truly unique collection this volume utilizes history to shed crucial light on Russia's complex occasionally inscrutable relationship with the world In so doing it raises the broader issue of the relationship of history to the study of contemporary foreign policy and how these two enterprises might be better joined

The French Language in Russia Derek Offord, Vladislav Rjéoutski, Gesine Argent, 2025-10-01 With support from the Arts and Humanities Research Council of the UK and the Deutsches Historisches Institut Moskau The French Language in Russia provides the fullest examination and discussion to date of the adoption of the French language

Translation and the Making of Modern Russian Literature Brian James Baer, 2015-11-19 Brian James Baer explores the central role played by translation in the construction of modern Russian literature Peter I's policy of forced Westernization resulted in translation becoming a widely discussed and highly visible practice in Russia a multi lingual empire with a polyglot elite Yet Russia's accumulation of cultural capital through translation occurred at a time when the Romantic obsession with originality was marginalizing translation as mere imitation The awareness on the part of Russian writers that their literature and by extension their cultural identity were born in translation produced a sustained and sophisticated critique of Romantic authorship and national identity that has long been obscured by the nationalist focus of traditional literary studies By offering a re reading of seminal works of the Russian literary canon that thematize translation alongside studies of the circulation and reception of specific translated texts Translation and the Making of Modern Russian Literature models the long overdue integration of translation into literary and cultural studies
