Chandler,Edith Powell,2018-07-10 An important historical account of Tuskegee University s significant advances in health care which affected millions of lives worldwide Alabama s celebrated historically black Tuskegee University is most commonly associated with its founding president Booker T Washington the scientific innovator George Washington Carver or the renowned Tuskegee Airmen Although the university s accomplishments and devotion to social issues are well known its work in medical research and health care has received little acknowledgment Tuskegee has been fulfilling Washington s vision of healthy minds and bodies since its inception in 1881 In To Raise Up the Man Farthest

Down Dana R Chandler and Edith Powell document Tuskegee University's medical and public health history with rich archival data and never before published photographs. Chandler and Powell especially highlight the important but largely unsung role that Tuskegee University researchers played in the eradication of polio and they add new dimension and context to the fascinating story of the HeLa cell line that has been brought to the public's attention by popular media. Tuskegee University was on the forefront in providing local farmers the benefits of agrarian research. The university helped create the massive Agricultural Extension System managed today by land grant universities throughout the United States. Tuskegee established the first baccalaureate nursing program in the state and was also home to Alabama's first hospital for African Americans. Washington hired Alabama's first female licensed physician as a resident physician at Tuskegee. Most notably, Tuskegee was the site of a remarkable development in American biochemistry history: its microbiology laboratory was the only one relied upon by the National Foundation for Infantile Paralysis, the organization known today as the March of Dimes, to produce the HeLa cell cultures employed in the national field trials for the Salk and Sabin polio vaccines. Chandler and Powell are also interested in correcting a long held but false historical perception that Tuskegee University was the location for the shameful and infamous US Public Health Service study of untreated syphilis. Meticulously researched, this book is filled with previously undocumented information taken directly from the vast Tuskegee University archives. Readers will gain a new appreciation for how Tuskegee's people and institutions have influenced community health, food science, and national medical life throughout the twentieth century.

**Solidarity Blues** Richard Iton, 2003-06-19 A number of arguments have been made to explain the relative weakness of the American Left A preference for individualism the effects of prosperity and the miscalculations of different components of the Left including the labor movement have been cited among other factors as possible explanations for this puzzling aspect of American exceptionalism But these arguments says Richard Iton overlook a crucial factor the powerful influence of race upon American life Iton argues that the failure of the American Left lies in its inability to come to grips with the centrality of race in the American experience Placing the

history of the American Left in an illuminating comparative context he also broadens our definition of the Left to include not just political parties and labor unions but also public policy and popular culture an important source for the kind of cultural consensus needed to sustain broad social and collectivist efforts Iton says In short by exposing the impact of race on the development of the American Left Iton offers a provocative new way of understanding the unique orientation of American politics
