The Man Who Rode Sharks:

The Man who Rode Sharks William R. Royal, Robert Forrest Burgess, 1978 Secrets of the Springs Robin Brown, Scott Derks, 2020-12-01 This tale of two deep springs in Florida that began as sinkholes about 13 000 years ago and the story of the precious water they contained reveals the recent and prehistoric story of what is now the Sunshine State and the importance of its natural resources to its people The mineral charged spring water sustained Florida's earliest human populations roaming hunter gatherers who discovered the springs about 10 000 years ago and revisited them for thousands of years in dry times and preserved their bones and artifacts for thousands of years These dramatic tales based on the history of Florida's first people offer new perspectives on Florida's long history The second time period is recent and factual Often outrageously stranger than fiction it follows recent events in the history of the springs the remarkable people who dived in the deep water filled holes and put together the picture of human life ways 10 000 years ago at the end of the Pleistocene Era DNA analysis by world renown Svante Paabo revealed that these first Floridians were unrelated to the Native Americans living in North America today **The Cave Divers** Robert Forrest Burgess, 1999 Cave divers are the elite and this is their story a story of pushing the limits of technology and human endurance *The Art and Archaeology of Florida's Wetlands* Barbara A. Purdy, 2017-12-06 Waterlogged archaeological sites in Florida contain tools art objects dietary items human skeletal remains and glimpses of past environments that do not survive the ravages of time at typical terrestrial sites Unfortunately archaeological wet sites are invisible since their preservation depends upon their entombment in oxygen free organic deposits As a result they are often destroyed accidentally during draining dredging and development projects These sites and the objects they contain are an important part of Florida's heritage They provide an opportunity to learn how the state's earliest residents used available resources to make their lives more comfortable and how they expressed themselves artistically Without the wood carvings from water saturated sites it would be easy to think of early Floridians as culturally impoverished because Florida does not have stone suitable for creating sculptures This book compiles in one volume detailed accounts of such famous sites as Key Marco Little Salt Spring Windover Ft Center and others The book discusses wet site environments and explains the kinds of physical chemical and structural components required to ensure that the proper conditions for site formation are present and prevail through time The book also talks about how to preserve artifacts that have been entombed in anaerobic deposits and the importance of classes of objects such as wooden carvings dietary items human skeletal remains to our better understanding of past cultures Until now this information has been scattered in obscure documents and articles thus diminishing its importance Our ancestors may not have been Indians but they contributed to the state's heritage for more than 10 000 years Once disturbed by ambitious dredging and draining projects their story is gone forever it cannot be transplanted to another location **Lessons From My Parents** Ashley Nance, 2013-05-01 Have you ever experienced a moment in your life when you began to appreciate the stories and lessons your parents might have shared

with you Perhaps it was a moment quietly working when your father told you of his painful experience during WWII or when your mother taught you about beauty while picking daffodils for her neighbor or when in a moment of tragedy you recall how your parents handled something so difficult with such poise and strength that it helped you go on Our culture and our history is created through stories personal stories whether funny or sad light or difficult poignant or profound Lessons From My Parents has collected 100 such stories from writers from across the world and shares them in this seminal work celebrating the life lessons we learn without even realizing it

Altenhofen Sgt William G. Altenhofen,2014 When I was assigned an infantry MOS in spite of having a profile I first thought about what the Psychiatrist had told me He said I lost my temper very fast and it was uncontrollable My first reaction was to get very angry my mind seemed to blow up I wanted to scream at him that he was wrong Then I realized that was just what he had just told me So I always worried that I would get into a situation where I would need all my facilities about me and I would lose it and cause one or more people to get injured because I was not thinking properly I found it easy to operate in the infantry The operating manuals were written so they were easy to understand I passed all the schools I had to attend and I was considered very efficient However I was not the loud screaming bully that was typical of the Infantry Sergeant I was often criticized because I did not scream at the troops I found that if you talked to them using good English I got more done So I did not use curse words or degrade people in any manner I learned when I went to my first Infantry unit that if I told them I had a profile and that I could type I would be put in a dead end job that earned no rewards so I would just be marking time I could not operate that way As soon as I could I got rid of the profile I got a few breaks and considered myself very lucky to accomplish as much as I did in the Army I wrote mostly about myself but I did include bits about people who I considered outstanding good or bad I hope you enjoy reading this as much as I enjoyed living it SFC Ret William G Altenhofen
