C.C. Pinder, L.F. Moore, 2012-12-06 Late one afternoon in the fall of 1976 we were sipping Sanka and speculating on the possible directions towards which research and theory in organizational science might lead One of us had just re read Walter Nord's Marxist critique of Human Resource Management and the discussion evolved into an enumeration of the many articles that had appeared in the recent literature attacking the discipline its mission and its methods In no time the list was long enough to suggest that a number of scholars both young and established were dissatisfied with the rate of progress begun made in the accumulation of knowledge about organizations The critics we identified were located at many different schools and they were associated with diverse research traditions and biases The causes they identified as underlying the problems they cited varied as did the solutions they offered We decided to pursue these polemics with a view to seeking commonalities among them hoping that if there were any dominant common themes it might be possible to anticipate the directions the field could take Our reading and thinking led us to the conclusion that many of the issues being raised by the critics of the discipline could be seen as disagreements over some implicit or ignored metaphysical and epistemological assumptions about organizations We hypothesized that much of the controversy resulted from a lack of consensus regarding what organizations are and how knowledge about them can be developed **The Power of Group Attachment** Arturo

Ezquerro, María Cañete, 2024-09-02 The Power of Group Attachment provides evidence for the fundamental role that interpersonal and group attachment have played in our survival and evolution as individuals groups organisations and

species Arturo Ezquerro and Mar a Ca ete deliver a creative integration of updated theoretical knowledge meticulous research and inspiring clinical work they go beyond the consulting room and draw on cross cultural studies to postulate that there is no such thing as individual or interpersonal attachment without group attachment Their joint work enhances and brings closer together the fields of group analysis and attachment theory Compelling narratives from group analytic psychotherapy for a broad range of problems including trauma suicidality mood disorder and psychosis demonstrate effective change from polarisation and hatred idealising one s own group and denigrating other s to working through conflict and accepting real differences between members the hallmark of both therapy and healthy social life Original scholarly yet personal and accessible the book is addressed to mental health professionals and managers as well as politicians and educators it expands the reader s social and democratic consciousness at this crucial time when our world is descending fast into pathology global warming and vicious violence stemming from unresolved personal and collective trauma
