The Managers Advisor:

Confucius Advising The Manager Claudio Pardo Molina, 2020-07-20 This book provides practical advice for the daily management of a company. Managers have to deal with ethical or moral issues all the time and do not necessarily have the academic background to respond to these challenges. Because of this I wrote this book with a series of recommendations for decision making based on Confucius millenarian book Analects. It is as if we were lucky enough to be able to hire as external consultant the wise Confucius born more than 2000 years ago.

The Principles of Alternative Investments

Management Ewelina Sokołowska, 2015-06-24 The purpose of this book is to present the principles of alternative investments in management. The individual chapters provide a detailed analysis of various classes of alternative investments on the financial market. Despite many different definitions of alternative investments it can be assumed that a classical approach to alternative investments includes hedge funds, fund of funds, FOF, managed accounts, structured products and private equity, venture capital. Alternative investment in keeping with this broad definition is the subject of consideration here. The theoretical part of each chapter is meant to collect, systematize and deepen readers' understanding of a given investment category, while the practical part of each focuses on an analysis of the current state of development of alternative investments on the global market and outlines the prospects of future market development. This book will be a valuable tool for scholars, practitioners and policy makers alike.
