Islam, Christianity and the Making of Czech Identity, 1453-1683 Laura Lisy-Wagner, 2016-05-06 Unlike many narratives about the Czech lands which place them on the periphery of their own history this study considers Czechs as central characters looking both east and west to find their place in the early modern world Islam Christianity and the Making of Czech Identity 1453 1683 works through the descriptive and ethnographic texts produced by Czech speakers about Islam and the Ottoman Empire to show how they used this discourse to create Czech identities Rather than simply constructing identity in opposition to the Islamic Other Laura Lisy Wagner shows how these authors played the Holy Roman and Ottoman Empires off each other creating an autonomous space for themselves in between Lisy Wagner introduces sources that are new to English language historiography and uses them in a way that is new to Czech historiography as well The chapters are organized based on different categories of agents travelers ethnographers religious leaders artists and political revolutionaries whose voices cast ideas of Europe and Czech identity in the early modern period in a new and different light

The Expansion of Central Europe in the Middle Ages Nora Berend, 2017-05-15 This volume brings together a set of key studies on the history of medieval Central Europe Bohemia Hungary Poland along with others specially commissioned for the book or translated and a new introduction This region was both an area of immigration and one of polities in expansion Such expansion included the settlement and exploitation of previously empty lands as well as rulers attempts to incorporate new territories under their rule although these attempts did not always succeed Often German immigration has been prioritized in scholarship and the medieval expansion of Central Europe has been equated with the expansion of Germans Debates then focused on the positive or negative contribution of Germans to local life and the consequences of their settlement This perspective however distorts our understanding of medieval processes On the one hand Central Europe was not a passive recipient of immigrants Local rulers and eventually nobles benefited from and encouraged immigration they played an active role On the other hand German immigration was not a unified movement and cannot be equated with a drang nach osten Finally not just Germans but also various Romance speaking and other immigrant groups settled in Central Europe This volume therefore seeks to present a more complex picture of medieval expansion in Central Europe

The Household and the Making of History Mary S. Hartman, 2004-04-12 This book argues that a unique late marriage pattern discovered in the 1960s but originating in the Middle Ages explains the continuing puzzle of why

western Europe was the site of changes that from about 1500 gave rise to the modern world. Contrary to views that credit upheavals from the late eighteenth century were responsible for ushering in the contemporary global era, it contends that the roots of modern developments themselves are located in an event more than a millennium earlier when the peasants in northwestern Europe began to marry their daughters almost as late as their sons. The appearance of this late marriage system with its unstable nuclear household form will also be shown to have exposed for the first time the common ingredients whose presence has perpetuated beliefs in the importance of gender difference and of a sexual hierarchy favoring males.

Medieval Frontiers: Concepts and Practices David Abulafia, Nora Berend, 2017-03-02

In recent years the medieval frontier has been the subject of extensive research. But the term has been understood in many different ways: political boundaries, fuzzy lines across which trade, religions, and ideas cross; attitudes to other peoples and their customs. This book draws attention to the differences between the medieval and modern understanding of frontiers, questioning the traditional use of the concepts of frontier and frontier society. It contributes to the understanding of physical boundaries as well as metaphorical and ideological frontiers, thus providing a background to present-day issues of political and cultural delimitation. In a major introduction, David Abulafia analyses these various ambiguous meanings of the term frontier in political, cultural, and religious settings. The articles that follow span Europe from the Baltic to Iberia, from the Canary Islands to central Europe, Byzantium and the Crusader states. The authors ask what was perceived as a frontier during the Middle Ages. What was not seen as a frontier despite the usage in modern scholarship? The articles focus on a number of themes to elucidate these two main questions. One is medieval ideology. This includes the analysis of medieval formulations of what frontiers should be and how rulers had a duty to defend and/or extend the frontiers; how frontiers were defined, often in a different way in rhetorical/ideological formulations than in practice; and how in certain areas frontier ideologies were created. The other main topic is the emergence of frontiers: how medieval people created frontiers to delimit areas; how they understood and described frontiers. The third theme is that of encounters and a questioning of medieval attitudes to such encounters. To what extent did medieval observers see a frontier between themselves and other groups, and how does real interaction compare with ideological or narrative formulations of such interaction?

More Philip Coggan, 2020-02-13

There are 17 ingredients in a typical tube of toothpaste: from titanium dioxide to xanthum gum, and that's not counting the tube. Everything had to come from somewhere, and someone had to bring it all together. The humblest household product reveals a web of enterprise that stretches around the globe. More is the story of how we spun that web. It begins with the earliest glimmerings of long-distance trade: obsidian blades that made their way from what is now Turkey to the Iran-Iraq border 7,000 years before Christ, and ends with the consequences of the Covid-19 pandemic. On such a grand scale, quirks of historical perspective leap out: futures contracts and commercial branding are among the many seemingly modern components of the global economy that have existed since ancient times. Yet it was only in the 18th century that a cascade of innovations began to

drive up prosperity in a lasting way around the world To piece this fascinating saga together Philip Coggan takes the reader inside medieval cottages and hi tech hydroponic farms prehistoric Chinese burial mounds and modern central banks At every step of our journey he finds that it was connections between people that created our wealth Will the same openness continue to serve us in the 21st century

Lords of the Central Marches Brock Holden,2008-08-07 In the Middle Ages the March between England and Wales was a contested militarised frontier zone a land of war With English kings distracted by affairs in France English frontier lords were left on their own to organize and run lordships in the manner that was best suited to this often violent borderland The centrepiece of the frontier society that developed was the feudal honour and its court and in the March it survived as a functioning entity much longer than in England However in the twelfth century as the growing power of the English crown threatened Marcher honours their lords asserted their independence from the king s courts and the March became a land where the king s writ did not run At the same time the increased military capability of their Welsh adversaries put the Marcher lordships under enormous military and financial strain Brock Holden describes how this unusual frontier society developed in reaction to both the challenge of the native Welsh and the power of the English kings Through a multi faceted examination political economic social legal and military of the lordships of the Central March of Wales it examines how the feudal matrix of Marcher power developed over the course of the eleventh to thirteenth centuries
