Proceedings of the National Heart and Lung Institute Working Conference on Health Behavior, Basye, Virginia, May 12-15, 1975 ,1975 **Psychoanalysis, Classic Social Psychology and Moral Living** Paul Marcus,2019-12-06 In *Psychoanalysis Classic Social Psychology and Moral Living* Let the Conversation Begin Paul Marcus uniquely draws on psychoanalysis and social psychology to examine what affects the ethical decisions people make in their everyday life Psychoanalysis traditionally looks at early experiences concepts and drives which shape how we choose to behave in later life In contrast classic social psychology experiments have illustrated how specific situational forces can shape our moral behaviour In this ground breaking fusion of psychoanalysis and social psychology Marcus gives a fresh new perspective to this and demonstrates how in significant instances these experimental findings contradict many presumed psychoanalytic ideas and explanations surrounding psychoanalytic moral psychology Examining classic social psychology experiments such as Asch s line judgement studies Latan and Darley s bystander studies Milgram s obedience studies Mischel s Marshmallow Experiment and Zimbardo s Stanford Prison Experiment Marcus pulls together insights and understanding from both

disciplines as well as ethics to begin a conversation and set out a new understanding of how internal and external factors interact to shape our moral decisions and behaviours Marcus has an international reputation for pushing boundaries of psychoanalytic thinking and with ethics being an increasingly relevant topic in psychoanalysis and our world this pioneering work is essential reading for psychoanalysts psychoanalytic psychotherapists moral philosophy scholars and social psychologists

A Most Human Enterprise Donald O. Granberg, John Galliher, 2012-07-10 A Most Human Enterprise looks at controversial social science research methods and their effects on subjects and researchers In detailing case studies in which plagiarism was alleged subjects were mislead or seriously abused and research denigrated certain demographics Donald O Granberg and John F Galliher demonstrate how social scientists have strayed from the ethical standards of scientific research Case studies include the infamous Tuskegee Syphilis Study the well known pseudo prison work of Philip Zimbardo the obedience research of Stanley Milgram and the study of sex in public places by sociologist Laud Humphreys Many of the studies that were most damaging to human subjects were funded by government making the current concerns of university Institutional Review Boards seem ironic A Most Human Enterprise also investigates consequences of plagiarism in the social sciences the role that whistle blowers can play and the consequences of their acts Humans are of course capable of lofty and amazing accomplishments Yet they are nevertheless also subject to bias prejudice ego involvement and poor judgment This book demonstrates the inadequacy of Institutional Review Boards in limiting ethical lapses in the social sciences and seeks to create a reader more sensitive to the problems and pitfalls that arise in the course of doing social research

Sollod, Christopher F. Monte, 2008-01-22 *Beneath the Mask* presents classic theories of human nature much as each theorist might if the theorist were to teach his or her ideas to people encountering them for the first time Through a theorist by theorist approach this Eighth Edition continues to explore the ideas of personality theorists developmentally incorporating the personal origins of ideas to illuminate links between the

psychology of each theorist and that theorist's own psychology of persons Beneath the Mask presents the sequence of thinking for more than 20 theorists and demonstrates how the thinking that led to major theories is nested in the life experience of the theorists within the context of the surrounding culture The authors emphasize each theorist's life history as the basis for the ideas that constitute his or her theories making them easier to understand as pictures of human nature John P Wilson has revised the text in a manner that preserves and improves upon the best features of the late Robert N Sollod and Christopher Monte's work Attitudinal Judgment Richard J. Eiser, 2012-12-06 Despite the central place that the study of attitudes has long held in social psychological research the last decade or so has been relatively quiet as far as the development of attitude theory has been concerned If one looks back to the Yale studies on communication and persuasion in the 1950s followed by the massive literature derived from cognitive dissonance theory and its alternatives there may be a temptation to think that the well of researchable questions has run almost dry The purpose of this book is to convince the reader that this is not the case On the contrary a new look at the concept of attitude offers the prospect of as rich and varied a range of questions as ever before The term new look is an old one in social psychology It was used 30 to 40 years ago as the designation for the school of thought which held that basic psychological processes such as perception cognition learning and memory could be influenced by attitudes motives and values There are still lessons to be learned from that period and the new new look that is now emerging incorporates some of these same themes albeit in the context of changing issues and emphases
