Time Travel David Wittenberg, 2016-01-01 This stimulating contribution to literary theory reveals the deeply philosophical concerns and developments behind popular time travel sci fi London Review of Books In *Time Travel* literary theorist David Wittenberg argues that time travel fiction is not mere escapism but a narrative laboratory where theoretical questions about storytelling and by extension about the philosophy of temporality history and subjectivity are presented in story form Drawing on physics philosophy narrative theory psychoanalysis and film theory Wittenberg links innovations in time travel fiction to specific shifts in the popularization of science from nineteenth century evolutionary biology to twentieth century quantum physics and more recent multiverse cosmologies Wittenberg shows how popular awareness of new science led to surprising innovations in the literary time machine which evolved from a vehicle used for sociopolitical commentary into a psychological device capable of exploring the temporal structure and significance of subjects' viewpoints and historical events *Time Travel* draws on classic works of science fiction by H G Wells Edward Bellamy Robert Heinlein Samuel Delany and Harlan Ellison television shows such as *The Twilight Zone* and *Star Trek* and other popular entertainments These are read alongside theoretical work ranging from Einstein Schrödinger Stephen Hawking to Gérard Genette David Lewis and Gilles Deleuze Wittenberg argues that even the most mainstream audiences of popular time travel fiction and cinema are vigorously engaged with many of the same questions about temporality identity and history that concern literary theorists media and film scholars and philosophers

Deadlands David Gerrold, 2014-01-28 David Gerrold burst onto the science fiction scene in the late sixties with more Hugo and Nebula nominations than any other writer had ever received at the beginning of his career. His first collection of stories, *With a Finger in My I*, showcased his remarkable range. The jewel in that collection was *In the Deadlands*, a bizarre and disturbing journey into a landscape of madness, not so much a story as a sculpture made of words. Nominated for the Nebula award for best novelette of the year, *In the Deadlands* has been out of print for 40 years. This new collection contains all the stories from *With a Finger in My I* plus four other works written in the same period with revealing notes from the author.

The Time Machine Hypothesis Damien Broderick, 2019-07-12 Every age has characteristic inventions that change the world. In the 19th century it was the steam engine and the train. For the 20th, electric and gasoline power, aircraft, nuclear weapons, even ventures into space. Today the planet is awash with electronic business chatter and virtual reality entertainment so brilliant that the division between real and simulated is hard to discern. But one new idea from the 19th century has failed so far to enter reality: time travel using machines to turn the time dimension into a two-way highway. Will it come true as foreseen in science fiction? Might we expect visits to and from the future sooner than from space? That is the Time Machine Hypothesis examined here by futurist Damien Broderick, an award-winning writer and theorist of the genre of the future. Broderick homes in on the topic through the lens of science as well as fiction, exploring some fifty different time travel scenarios and conundrums found in the science fiction literature and film. **The Trouble with Tribbles** David
