The Management Of Archives:

The Management of Information from Archives Michael Cook, 2017-03-02 This authoritative guide to the principles and practice of archives management in private and public sector organizations has been substantially revised. It now provides detailed advice on changes in national and international standards and approaches in particular ISAD G International Standard Archival Description and ISASAR CPF International Standard Archive Authority Record. The new edition also includes guidance on the interpretation of the Manual of Archival Description also published by Gower. Michael Cook takes the reader through the history, definition and function of archives and archival services, international service models, staffing and resource issues. He explains how to set up and run a records management programme, manage the interface with archival management, conduct a records survey, set up retention schedules and organize appraisal, acquisition and disposal in a way which ensures the service meets organizational and individual needs. Chapters covering the arrangement, coding and description of archival material and the administration of its physical storage demonstrate how efficient management facilitates the accessibility of archival information. The book concludes with chapters on computing and user issues such as rights of access, Freedom of Information, security and data protection standards. This key reference on best practice is intended for students and lecturers in archives administration and records management and for archives and records managers, particularly those newly qualified or seeking professional registration. Managers without formal qualifications but responsible for records or archives management and information managers working with archivists and records managers will find it helps to improve working methods and to run a more effective archives service within the modern information management environment. **The Management of Archives** Theodore R.
